INSTRUMENTS AND EXPERIMENTAL TECHNIQUES

Volume 17, Numbers 1-6, 1974

(A translation of Pribory i Tekhnika Éksperimenta)

Volume 17, Number 1, Part 1 January-February, 1974

	Engl.	Russ.
Selective RC Circuits. (Review)—V. V. Maslennikov, V. A. Isaikin, and V. P. Tarasov	1	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
The "Terek-2" High-Current Pulsed Electron Accelerator—Yu. F. Bondar', B. M. Koval'chuk, A. M. Rybalov, and P. S. Strelkov	17	25
A Simple Method for Measuring the Energy of Electrons in the Beam of an Accelerator—A. P. Balashov	20	27
A Pulsed Charge-Exchange Source of Negative Hydrogen Ions—G. I. Dimov and G. V. Roslyakov	22	29
A Triaxial Crystal Neutron Spectrometer—V. G. Shapiro, S. P. Solov'ev, O. L. Kukhto, and O. N. Efimovich	29	36
A Monochromator for Slow Neutrons—O. L. Kukhto, A. P. Konstantinov, V. E. Ruchkov, S. P. Solov'ev, and V. G. Shapiro	32	39
An Emission-Bunch Spectrometer for the Investigation of Elementary Photoelectric Processes—O. M. Sorokin	34	40
Increasing the Stability of Scintillation Spectrometers—I. Sabol and I. Sheda	37	42
The Shape of the Equipment Line of a Semiconductor Alpha Spectrometer—É. K. Stepanov, S. A. Stoyanova, and N. V. Tyutikov	39	44
An Installation for Measuring the Angular Anistropy of Alpha Decay and Fission of Oriented Actinide Nuclei—N. N. Gonin, L. K. Kozlovskii, Yu. Ya. Stavisskii, and D. I. Tambovtsev	42	47
A Spark Gamma Telescope for Cosmic Gamma Radiation—A. M. Gal'per, A. V. Kurochkin, N. G. Leikov, B. I. Luchkov, and Yu. T. Yurkin	45	50
A Proportional Counter for Recording Ultrasoft X Radiation—V. N. Smirnov and Yu. P. Seregin	48	52
A Semiconductor Detector of Pulsed High-Intensity Gamma Radiation—V. V. Vorob'ev, V. N. Afanas'ev, and V. F. Khokhryakov	51	55
Increasing the Sensitivity of Surface-Barrier Photoreceivers—G. N. Groshkova, O. V. Zakharchuk, M. M. Koltun, and O. P. Fedoseeva	54	57
Investigating a Resonance Scintillation Detector—A. V. Dolenko, B. G. Egiazarov, É. M. Raikhman	56	58
Scintillation Granules in the Ccincidence Method—T. N. Seredenko, V. M. Solomonov, Yu. A. Tsirlin, and V. M. Ékkerman	59	61
ELECTRONIC AND RADIO ENGINEERING		
Automatic Microphotometer on a Line with an Electronic Computer. Processing of Beta Spectrograms—L. A. Vylova, V. A. Zalite, G. Iskhakov, F. V. Levchanovskii, M. Potempa, V. I. Prikhod'ko, A. V. Revenko, Z. Stakhura, and V. M. Tsupko-Sitnikov	63	64
The Use of Digital Discriminators for Preliminary Takeoff of Information in Two-Dimensional Analysis—S. V. Medved', A. N. Sinaev, Kh. Khaupt, G.-Yu. Tsakher, and L. P. Chelnokov	68	68
An Anticoincidence Circuit for the Nanosecond Range and a High-Speed Scaling Decade Based on Microcircuits—A. N. Kozyr'kov and V. S. Romanov	72	71
A Discriminator for Single Events—A. G. Morozov	77	76
A Transistorized Coincidence Circuit with an Increased Takeoff Coefficient—M. I. Vol'nov	75	74
Direct Conversion of a Binary Code into a Binary-Decimal Code—A. N. Volkov, E. V. Golubovskii, A. M. Klabukov, and I. V. Shtranikh	82	80

	Engl.	Russ.
Code Disks of Angle-Code Converters with Arbitrary Quantization—I. V. Naumov	88	86
A Voltage—Frequency Converter Based on a 1UT402 Operational Amplifier—V. V. Lopatin	89	87
A Current—Frequency Converter for Operation with an Ionization Chamber—V. G. Zinov and B. S. Krasnoborodov	92	89
A Linear Converter for Converting a Resistance into a Frequency Based on Integrated Microcircuits—I. F. Ostrovskii, É. K. Shakhov, A. Ya. Éliasberg, and A. L. Zlatin	94	91
An Automatically Tunable Heterodyne for Frequency-Response Meters—Yu. P. Kuz'min, A. A. Remesnik, and Yu. E. Genshaft	97	93
Pulse Devices Based on Logical Elements—A. D. Rudnev	100	96
Generator Producing Pulse Voltages of 600 kV with an Increased Actuation Frequency —I. I. Kalyatskii, V. I. Kurets, V. N. Safronov, M. Kh. Galeev, and A. D. Shuloyakov	105	99
Generator Producing Trains of High-Voltage Pulses in the Nanosecond Range—I. Ya. Timoshin and E. I. Kolobanov	107	101
A Magnetic-Thyristor Generator Producing High-Voltage Nanosecond Pulses—A. N. Vorob'ev, V. M. Bogdanov, F. L. Gerchikov, V. G. Guk, and A. A. Ushakov	110	103
A Pulse Generator with Automatic Amplitude Stabilization—V. I. Breido, L. R. Romanov, and V. F. Darovskikh	112	104
Multivibrators Based on Avalanche Transistors—V. P. D'yakonov and S. I. Zienko	116	107
Electronic Circuits for Controlling Flashlamps—P. N. Yarovoi and V. M. Khulugurov	119	110
A Stabilizer for Stabilizing Current Pulses in a Deflecting Coil—A. V. Zhukov, V. P. Mikheev, G. V. Pis'mennyi, V. I. Pribytov, B. S. Rozov, and V. I. Savel'ev	121	111
A High-Speed Pulse Distributor Based on Integrated Microcircuits—V. M. Barbasov, E. N. Belov, and A. K. Solov'ev	123	113
Amplitude Control of Pulses Shaped by Means of Two-Electrode Spark Gaps—M. V. Mityaev and Yu. M. Tolchenov	126	116
Measurement of the Actuation Time of Spark Gaps in a Cascade Pulse-Voltage Generator —I. R. Pekar'	128	117
A High-Voltage Water Spark Gap with Laser Firing—V. A. Demidov, M. V. Ivkin, V. A. Petrov, and S. D. Fanchenko	131	120
Powerful Capacitor Banks Having an Energy Capacity of 1.35 and 2.7 MJ—A. I. Pavlovskii, E. N. Smirnov, V. Ya. Latysh, V. N. Suvorov, and A. A. Cherkasov	134	122
A Generator Producing Random Low- and Infralow-Frequency Signals—B. A. Verklov, S. I. Zaitsev, and Yu. A. Berezhko	139	127
A Device for Automatic Search for the Intervals of a Noise Frequency Spectrum Which Are Free from Narrowband Interferences—A. A. Gorbachev and G. I. Lazdin	142	129
The Input Stage of a Broadband Phasemeter—A. M. Fishtein	144	131
A Transistorized Peak-Detector Block—V. G. Galalu	146	133

Volume 17, Number 1, Part 2 January-February, 1974

A Compensation Base-Level Restorer—O. I. Andronov and V. G. Brovchenko	149	135
A Device for Differentiation and Integration of Slowly Varying Electrical Signals —L. N. Gal'perin, L. B. Mashkinov, and B. I. Nevol'nichenko	151	136
Measurement of Extremal Values and Integration of Rapidly Varying Irregular Signals by Means of a Pulse-amplitude Analyzer—K. A. Zhdanov, V. G. Zatsepin, and É. A. Tishchenko	154	138
A Divider for Dividing the Voltage of Two Electrical Signals—S. G. Semenchinskii	156	140
The Use of Industrial Frequency Synthesizers for the Discrete Frequency Sweep of a Nuclear Magnetic Resonance Spectrum—V. A. Zabrodin, V. E. Solov'ev, and L. N. Gal'perin	158	141
A Field-Effect Transistor Superregenerator with Self-Quenching for Observation of Nuclear Quadrupole Resonance—V. P. Anferov, V. S. Grechishkin, and M. I. Krukover	161	144
A Transmitted-Power Meter Based on an Absorptive Wall—L. G. Martynenko, V. M. Volkov, V. D. Kukush, and A. M. Zelenskii	163	145
Bench for Measurement of the Dynamic Characteristics of Photoelectron Multipliers —É. É. Tardenak, and Ya. É. Tiberg	165	147

	Engl.	Russ.
A Device for Controlling the Heating of Thermoluminescent Detectors according to a Linear Law — V. G. Kharitonov, A. I. Shaks, É. L. Lebedev, and V. A. Trifonov	168	150
A Remote Control Circuit — S. I. Pasko	171	152
Recording of the Coordinates of a Moving Plasma Pinch — É. A. Tishchenko, V. G. Zatsepin, and K. A. Zhdanov	173	153
A Current and Voltage Stabilizer with a Broad Control Range — V. I. Bab'yak, I. M. Kanevskii, A. M. Kolomatskii, and E. V. Skazochkin	175	155
GENERAL EXPERIMENTAL TECHNIQUES		
The "Polimass" Mass Spectrometer with Simultaneous Recording of a Broad Mass Spectrum — É. A. Shafranovskii, S. Yu. Semenov, V. D. Grishin, and V. L. Tal'roze	177	157
Engineering of Investigations of a Positive Column of a Gas Discharge in Metal Vapors at High Temperatures — P. A. Bokhan, E. S. Bukova, G. S. Kiyashkina, V. M. Klimkin, and V. I. Solomonov	180	160
Measurement of the Spectrum of Secondary Ion—Electron Emission by the Phase-Sensing Method — V. Soshka and T. Barbashevski	182	162
A Photoelectron Spectrometer for Investigating Vapors of Nonvolatile Substances — M. E. Akopyan and M. M. Timoshenko	185	164
The Effect of the Spectral Composition of the Illumination on the Amplitude Distribution of the Output Signal of One-Electron FÉU-64 Photomultipliers — S. S. Vetokhin, I. V. Reznikov, and V. L. Vereshchagin	188	166
Unitized Ultra-High-Vacuum Rotating Input Leads — I. G. Blinov, A. I. Boreiko, E. A. Deulin, and Yu. A. Khrunichev	191	168
Pulsed Supply of the Magnetic Focusing System of an Image Converter — B. E. Dashevskii, S. S. Eliseev, and Yu. I. Malakhov	194	170
A Nitrogen Laser with a Thyratron Power Supply System — V. F. Tarasenko	197	172
Selection of Vibrational—Rotational Transitions of a CO_2 Laser by Means of Internal Fabry—Perot Interferometers — V. G. Gromova, Yu. N. Gromov, and N. Sh. Khaikin	200	175
A Holographic Installation for Analog Pattern Recognition — G. N. Aleksakov, Yu. A. Bykovskii, A. I. Larkin, and A. A. Markilov	203	177
The Use of Holography for the Investigation of the External and Internal Morphology of Crystals — I. N. Guseva, V. M. Ginzburg, E. N. Lekhtsier, and É. G. Semenov	206	180
A Pulsed Gas-Discharge Light Source with Predominantly Visible and Infrared Radiation — Yu. P. Andreev, Yu. G. Basov, and V. V. Ivanov	209	183
Low-Inductance Light Source with a Compact Luminescent Body — Yu. G. Basov and M. Yu. Vorob'ev	211	185
A Photoreceiver Based on a Single-Junction Transistor — I. M. Vikulin, M. A. Glauberman, L. F. Vikulina, Yu. A. Zaporozhchenko, and V. V. Garshenin	213	187
Sensitive Recording Photometers Based on Electrodeless Spectral Tubes — V. N. Larionov	217	190
Microchannel Brightness Intensifiers and Methods of Investigating Them — A. M. Tyutikov and G. S. Kravchuk	221	193
Investigation of Short Light Pulses under Conditions of Powerful Electromagnetic Stray Effects — O. S. Kolotov and V. A. Pogozhev	225	196
Optical Multipath Vessel for Investigating Absorption by Artificial Atmospheres — V. N. Aref'ev, O. A. Volkovitskii, N. V. Goncharov, and V. I. Dianov-Klokov	227	198
Interference Installation for Investigations of the Thermo- and Electro-Optical Properties of Crystals — Yu. L. Kopylov	231	202
The Null Method of Measuring Electro-Optical and Piezoelectric Coefficients of Crystals — A. L. Aleksandrovskii	234	205
Method for Measuring the Uniformity of the Magnetic Field of Superconducting Solenoids Having Ferromagnetic Fields at Room Temperature — Ya. L. Shamfarov, T. A. Smirnova, A. V. Tridub, and N. T. Cherpak	236	206
An Installation for Measuring the Magnetocaloric Effect with Time Recording — V. M. Belova, V. I. Nikolaev, and V. M. Stuchebnikov	239	209
Characteristics of a Three-Element Electrostatic Immersion Lens — G. K. Varakin	242	211

	Engl.	Russ.
The Application of Asymmetrical Monochromators in Obtaining Topograms in the Region of Extinction Contrast — E. N. Kislovskii, L. I. Datsenko, and A. S. Vasil'kovskii	244	213
An Installation for the Photometry of Electron-Diffraction Patterns of Molecules — N. V. Alekseev, N. I. Sergeev, V. N. Golubev, and N. N. Veniaminov	246	215
A Crystal Holder for an Ultra-High-Vacuum Electron-Diffraction Camera — M. I. Mednikov, Yu. S. Lobachev, L. K. Kovalev, K. A. Vladimirov, and V. I. Makarov	249	217
Weld-Free Attachment of the Filament of the Cathode in the UÉMV-100V Electron Microscope — A. S. Borodkin and V. L. Cherepnov	251	219
Determination of the Position of the Maximum of a Diffraction Profile — D. M. Vasil'ev and Yu. F. Titovets	252	220
A Device for Simulating Projection Images When Bodies Having an Inhomogeneous Structure Are Transilluminated — V. A. Vorob'ev, V. E. Golovanov, and V. K. Kivran	254	222
Autoionic Microscopy of Metallic Coils — R. I. Garber, V. S. Geisherik, I. M. Mikhailovskii, and L. I. Fedorova	257	224
Fabrication of the Points of Autoelectronic Emitters by Etching — V. Ya. Fridman	260	227
An Installation for Investigations of Thermally Stimulated Conductivity — A. L. Aleksandrov, V. M. Brylov, A. G. Zhdan, and M. A. Messerer	262	228
Obtaining the Films of Solid Solutions Based on $A^{IV}B^{VI}$ from a Mechanical Mixture of Powdered Compounds — D. M. Freik, V. V. Voitkiv, S. P. Oles'kiv, M. I. Belei, and M. A. Galushchak	265	230
Nonrectifying Juction Contacts for GaSb — L. P. Krukovskaya, L. V. Golubev, and Yu. V. Shmartsev	268	233
Measurement of the Specific Extent of the Interphase Boundaries in a Material — L. I. Skorobogat and L. G. Podobeda	270	234
Measurement of the Density of Liquids by a Total-Immersion Aerometer — V. A. Borzunov, V. N. Razumikhin, and V. A. Stekol'nikov	272	235
A Graphite Dilatometer for Investigations at High Temperatures — I. L. Gufel'd, V. N. Panezhin, E. G. Surin, and I. V. Chermashentsev	274	236
A Device for Vacuum Deposition of Thin Films of Stipulated Thickness — I. A. Belozerov	276	238
An Optical Heating Device for Mössbauer Investigations — N. F. Shchukin and V. A. Kovitskii	279	240
A Device for Temperature Investigations of Electron Paramagnetic Resonance Spectra — Yu. A. Bratashevskii, F. N. Bukhan'ko, and O. Z. Shapiro	280	241
A Circulation Thermal Probe — I. B. Uskov and V. S. Davydov	282	242
Reduction of the Number of Bubbles in Liquid Nitrogen in a Dewar for Optical Investigations — V. I. Ral'chenko	284	244
DEPOSITED PAPERS		
The Shape of the Line of Semiconductor Spectrometers for Ionizing Radiations — N. G. Volkov and Yu. V. Pyatkov	285	245
Comparison of the Principal Parameters of Pulse Transformers with Lumped Constants and Transformers Implemented Using Sections of Transmission Lines — V. D. Dvornikov, S. T. Latushkin, L. I. Yudin, and V. M. Komarov	287	246
A Superconducting Quantum Magnetic-Flux Meter Installation — N. V. Zavaritskii and A. N. Vetchinkin	290	247
An Instrument for Determining the Thermoelectric Parameters of Semiconductors By the Pulsed Probe Method — Yu. G. Basin, V. I. Bravarets, Yu. A. Grits, V. I. Isachenko, and E. A. Okunev	291	247
REVIEWS OF INSTRUMENTS		
Recording of Ionization Curves in a Mass Spectrometer — V. A. Mazunov, I. I. Furlei, V. S. Fal'ko, and V. I. Khvostenko	292	249
A Simple Circuit for Exchanging Information between AI-256-1 and LP-4840 Analyzers — Yu. V. Galushko and O. N. Razumov	293	250
The Input Device for the AI-4096 Analyzer in a Multicounter Operating Mode — S. P. Borovlev, M. I. Bulgakov, V. M. Garochkin, A. D. Gul'ko, Yu. A. Oratovskii, and S. S. Trostin	295	251

	Engl.	Russ.
Block for Coupling a VK7-10A/1 Voltmeter to a MPU16-2 Printer — Yu. V. Drunin, A. S. Meleshkin, Z. V. Oreshkina, and O. I. Orlov	297	252
NEW INSTRUMENTS		
The "Spektr-3-2" Automatic Integrator with a Digital Printer — A. L. Bezzubtsev, V. G. Kobchenko, and L. A. Kolomytsev	300	255
APPENDIX	i	

Volume 17, Number 2, Part 1 March-April, 1974

	Engl.	Russ.
The Engineering of Physics Experimentation in Eighteenth Century Russia. [On the 250th Anniversary of the Academy of Sciencies of the USSR] — Yu. M. Tsipenyuk	307	7
The Use of Lasers for Measurement of the Velocity of Light (Review) — V. M. Boitsov and N. V Kravtsov	319	23
NUCLEAR EXPERIMENTAL TECHNIQUES		
Current Losses during Recuperation of Energy from a Beam of Accelerated Electrons in a Longitudinal Magnetic Field — P. I. Blinov, G. I. Dolgachev, A. A. Kozlov, and I. N. Slivkov	328	31
An Injector of Negative Hydrogen Ions Having a Current of 20 mA — G. I. Dimov and G. V. Roslyakov	330	33
A Lithium Ion Neutralizer — B. A. D'yachkov, V. M. Nesterenko, and V. Yu. Petrusha	333	35
Increasing the Intensity of a Single-Mass Ion Beam in Mass-Monochromators by Means of a Decelerating System — O. A. Vinogradova, S. K. Dimitrov, A. M. Zhitlukhin, V. M. Smirnov, and V. G. Tel'kovskii	337	39
Identification of Heavy Particles Using Time-of-Flight — O. Yu. Goryunov, V. N. Dobrikov, O. F. Nemets, and A. T. Rudchik	339	41
A Polarimeter Having an Increased Efficiency — V. I. Soroka and A. I. Mal'ko	343	44
An Auger-Electron Spectrometer — V. E. Masyagin, A. I. Il'in, V. S. Red'kin, and and V. V. Zashkvara	345	45
Improvement of the Characteristics of an Electron Spectrometer by Means of a Triplet Consisting of Quadrupole—Octupole Lenses — E. P. Denisov and K. K. Smirnov	348	48
The Accuracy of the Localization of the Trajectories in a Helium Streamer Chamber — S. A. Krylov	350	49
A Magnetostrictive Wire Spark Chamber in a Magnetic Spectrometer — A. É. Tenishev, V. N. Skusinets, A. A. Zybalov, A. I. Derebchinskii, O. G. Konovalov, and S. G. Tonapetyan	352	51
A Fission-Fragment Detector Which Operates at Large Loadings — B. V. Zhuravlev, N. V. Kornilov, O. A. Sal'nikov, and V. M. Shubko	355	54
Comparison of Nuclear-Radiation Detectors according to a Performance Index — V. B. Ivanov, G. P. Lyadov, and V. I. Shipilov	359	57
Method for Measuring the Thickness of the Sensing Layer of Semiconductor Detectors — A. Z. Il'yasov and B. S. Mazitov	363	60
Investigation of the Dependence of the Rise Time of Scintillations in CsI on Activator Concentration — V. K. Lyapidevskii, V. A. Prorvich, and L. M. Shamovskii	366	62
A Five-Crystal Spectrometer for Measuring the Radiations from a Human Being — G. A. Fedorov, I. F. Moiseev, and I. E. Konstantinov	370	66
ELECTRONIC AND RADIO ENGINEERING		
Automatic Experimental Data Collection and Handling Systems Based on the "Promin-2" Electronic Computer — V. A. Alekseev, V. I. Zabolotskikh, R. E. Kamaeva, and S. R. Kiznertsev	374	69
A System for Controlling a Measurement Scanning Device — V. G. Vyskub, V. L. Mamaev, V. P. Mikheev, B. S. Rozov, and A. A. Shchurenkov	376	70
A Digital Voltmeter with Automatic Selection of the Recording Time — N. N. Balamatov	379	73

	Engl.	Russ.
An Automated System for Monitoring the Working Order of a Hodoscopic Installation — N. V. Vishnevskii, A. A. Derevshchikov, Yu. A. Matulenko, S. B. Nurushev, E. V. Smirnov, V. L. Solov'yanov, and V. Ya. Uglekov	382	76
The Analog Commutator in the CAMAC Standard — V. A. Aref'ev and S. G. Basiladze	386	79
A Fast Charge-Digital Converter — S. G. Basiladze and P. K. Man'yakov	390	82
An Extensively Used Converter Which Converts and Amplitude into a Pulse Train — V. A. Antyukhov and B. Yu. Semenov	394	85
Analog Memory Device for High-Speed Multichannel Voltage-Code Converters — D. D. Zakrevskii and Yu. M. Vishnyakov	399	90
Magnetic-Transistor Counter with Regeneration of Information — V. N. Svirin	401	91
A Magnetic Pulse Counter with a Variable Storage Coefficient — G. T. Chukavin	405	94
A Decimal Display Device Based on an IV-3 Tube — V. I. Yanenko	408	96
Increasing the Switching Rate of Cells of a Discrete Scanistor — V. P. Bruyakin and Yu. F. Sul'zhenko	410	97
A Shaper That Produces Start—Stop Pulses — S. N. Neustroev and A. K. Solov'ev	412	99
A Shaper Producing Pulses Having a Special Shape — G. P. Sheina	414	101
Multiple-Spark Operation of a Megavolt Trigatron — A. S. El'chaninov, V. G. Emel'yanov, V. M. Koval'chuk, G. A. Mesyats, and Yu. F. Potalitsyn	416	103
Long-Lived Low-Inductance Spark Gaps with a Continuous Stipulation of Gas — M. V. Babykin, A. I. Zhuzhunashvili, S. S. Sobolev, and V. V. Starykh	419	105
A Powerful Foil Breaker for a Current of 0.5 mA, Which Actuates in 5 μsec — L. V. Dubovoi, I. M. Roife, E. V. Seredenko, and B. A. Stekol'nikov	421	107
Precision Measurement of Time Shifts between Periodic Pulse Processes — V. N. Deryagin, L. E. Marasin, and Yu. V. Popov	423	109
Generators Producing Sawtooth and Triangular Voltages Based on One-Junction Transistors — V. P. D'yakonov, V. D. Drozdov, and Yu. B. Leshchinskii	425	111
A Generator Producing Random Quantities Having a Stipulated Distribution Law — V. A. Khristyuk and B. M. Chernovoi	430	114
A Meter for Measuring the Dispersion of a Random Quantity — S. S. Gasparyan	434	117
A Two-Channel Device for Synchronous Recording of the Shape of One-Shot Random Signals — V. E. Yamnyi, M. V. Komar, and P. P. Shklyarenko	436	119
Measurement of the Mean-Square Value of Noise Signals — I. L. Povkh, G. P. Eremin, V. G. Kondratenko, N. I. Plyusnin, and A. I. Yatsenko	440	122
Circuit for Measuring the Distribution Function of the Intensity Fluctuations of Laser Radiation — L. N. Gus'kov and B. I. Troshin	443	125
Stabilization of Noise by a FÉU-83 (FÉU-84) Modulator — G. A. Aver'yanov and E. G. Lebed'ko	445	127
Differential Amplifiers with Low Drift — V. I. Anisimov, M. V. Kapitonov, N. N. Prokopenko, and Yu. M. Sokolov	447	128
Method of Controlling the Speed of Response of an Electrometric Amplifier — R. E. Prilutskii	450	130
A Stable Source Follower — V. M. Musonov	453	133
A Selected RC Filter Based on an Operational Amplifier with Direct Coupling — A. F. Gorbatenko and A. M. Klimenko	455	134
Automatic Compensation of the Variations of Magnetic Interferences in the Working Space of an Electron Spectrometer — O. I. Klyushnikov, Yu. F. Ponomarev, and Yu. Ya. Reutov	457	136
A Block of Programs for a Pulsed Coherent Nuclear-Magnetic-Resonance Spectrometer — G. I. Dotsenko, B. I. Cherkasov, and Yu. N. Moskvich	461	139
On Investigating the Parameters of Dielectrics by the Method of a Semicoaxial Resonator — A. I. Tereshchenko and V. L. Mironenko	463	141

Volume 17, Number 2, Part 2 March-April, 1974

Determination of the Polarization Structure of a Specularly Reflecting Electromagnetic Wave — S. I. Pozdnyak, G. N. Anikeenko, V. P. Beridze, and A. N. Longinov	465	143

Engl./Russ.

An Installation for the Investigation of Radiation from Light-Emitting Diodes That Has Been Modulated in the Microwave Range – A. I. Zhil'tsov, A. L. Lamanov, V. V. Mitrofanov, Yu. V. Popov, and V. F. Tomin 468 146
Field-Sweep Block of a Superconducting Solenoid – G. F. Lybzikov and É. P. Zeer 470 148
A Precision Low-Voltage Economical Switch-Type Voltage Stabilizer – A. I. Loksh and A. P. Petukhov 472 149
A Stabilized AC-Voltage Source – Li Don Hua, I. K. Tabarovskii, and V. A. Alekseev 474 151

GENERAL EXPERIMENTAL TECHNIQUES

A Unipolar Mass Spectrometer Based on Semiconductor Elements – V. Kh. Teslenko and N. N. Bagrov 476 152
The Generator of a Three-Dimensional Quadrupole Mass Spectrometer with High-Speed Sweep of the Mass Spectrum – E. P. Sheretov, G. A. Mogil'chenko, V. A. Zenkin, and N. V. Veselkin 479 155
The Control Block of a Three-Dimensional Quadrupole Mass Spectrometer with Storage – É. P. Sheretov, A. F. Shalimov, G. A. Mogil'chenko, V. A. Zenkin, and N. V. Veselkin. 482 157
A High-Voltage Vacuum Diode with a Cold Cathode for Injection of an Electron Beam into a Gas Laser – S. P. Bugaev, A. V. Kochkarev, V. I. Manylov, and V. M. Paigin 485 160
A Source of Negative Ions for Vapor Substances – V. I. Paleev and É. Ya. Zandberg. 489 163
A Thermionic Source of Alkali Metals in a Pierce Gun – V. I. Chigin' 492 165
Protection of Viewing Windows from Being Coated with Condensing Ions – V. M. Arutyunov, V. N. Belinskii, S. D. Grishin, and S. N. Ogorodnikov. 495 167
High-Vacuum Detachable Joints for Repeated Utilization – G. A. Gusev 498 169
Measurement of the Gain of a Photoelectron Multiplier – M. A. Ganapetyan and E. S. Sarkisyan 501 171
Certain Features of the Distribution of One-Electron Pulses in a Photoelectron Multipler – I. S. Guk, A. N. Dovbnya, and A. S. Tarasenko 503 172
The Effect of the Spectral Composition of Radiation on the Modulation Depth of the Sensitivity of Photoelectron Multipliers – N. G. Musienko and B. A. Okhrimenko 506 175
Method of controlling the Photocurrent of a Photoelectron Multiplier with Louvered Dynodes – K. A. Gulgazaryan 509 177
A Pulsed Source of Coherent Visible and Ultraviolet Radiation Having a Stable Frequency – V. K. Makukha and V. M. Tarasov 511 179
A Coaxial-Cavity Flashlamp with a Reduced Magnetic Field – Yu. G. Basov and M. Yu. Vorob'ev 513 180
The Application of Electron-Optical Devices to the Recording of Short Illuminations – V. D. Ovsyannikov, V. I. Rovinskii, B. I. Rubinshtein, and V. S. Solov'ev 516 183
An Installation for Investigating Fast Variations of the Radiation Intensity of Injection Lasers Made of Gallium Arsenide – B. S. Vvedenskii, A. S. Logginov, V. V. Randoshkin, and K. Ya. Senatorov 520 186
Instrument for Measurement of the Intensity of Short Light Pulses – A. V. Klimov 523 189
A Grating That Serves as a Meter for Measuring the Energy of Laser Radiation Pulses – V. M. Kuz'michev, Yu. M. Latynin, and I. A. Priz 525 190
A Broadband Photon-Counting Receiver of Visible Radiation – A. S. Martynyuk and E. P. Nikolaev 529 193
A Differential Photoelectrocalorimeter – P. I. Gos'kov and Yu. K. Shelkovnikov 533 197
Stretchers of the Envelope of a Light Flash Having a Nanosecond Duration – I. D. Mitsenko and B. V. Galun 535 198
Bragg Scanning of Light Using a Lead Molybdate Crystal – V. N. Mozhaiskii 537 200
A Pulsed Electron Injector for the Excitation of Powerful Semiconductor Lasers – A. S. Nasibov and A. I. Svinenkov 541 204
Determination of the Lasing Losses in Solid-State Continuous-Wave Lasers – V. K. Novokreshchenov and N. V. Shkunov 545 207
An Installation for Investigating Semimetals in Pulsed Magnetic Fields of up to 900 kOe at Low Temperatures – N. B. Brandt, V. G. Karavaev, E. A. Svistova, and I. E. Yarembash 547 209

	Engl.	Russ.
Obtaining an Ultrapowerful Magnetic Field by the Capture and Compression of Flux by Means of a Short Cylindrical Shell – V. T. Mikhkel'soo, G. A. Shneerson, and and A. P. Shcherbakov	551	212
Obtaining Uniform Pulsed Magnetic Fields – V. A. Zakharov	555	215
A Mechanical Modulator for an Electromagnet – D. I. Bilenko, A. E. Lun'kov, and A. L. Medvedev	558	219
A Spherical Multiple-Dee Ultra-High-Pressure Device – G. S. Bobrovnichii and L. Yu. Maksimov	560	220
A Piston Piezometer for Measurement of the Volume of Compressed Gases at High Pressures – S. M. Stishov, I. N. Makarenko, and V. I. Fedosimov	563	223
A Chamber for Optical Investigations at Pressures of up to 50 kbar and Temperatures of 80-300°K – M. F. Shchanov and S. I. Subbotin	566	226
An Installation for Measuring Shear Stresses at High Pressures – A. A. Zharov and N. P. Chistotina	569	229
A Method for Monitoring X Radiation – E. M. Kravchuk and E. A. Strashkevich	572	231
The Use of Kikuchi Lines for a Unique Determination of the Orientation of Crystals – M. M. Myshlyaev and I. I. Khodos	574	233
High-Temperature Cells for the Evaporation of Nonvolatile Compounds – A. A. Ivanov	578	237
Determination of the Angular Characteristics of Objects on the Surface of an Asymmetrical Autoionic Emitter – V. V. Vinogradov, V. T. Borisov, and L. P. Potapov	581	239
An Installation for Investigating the Scattering of Light by Electron-Hole Drops in Germanium – V. S. Bagaev, N. V. Zamkovets, N. A. Penin, N. N. Sibel'din, and V. A. Tsvetkov	584	242
The Capacitive Method of Measuring the Thickness of Dielectric Layers in Samples with Holes – N. I. Lebedeva and N. S. Nesmelov	587	244
Growing Garnet Films from Supercooled Melts – V. N. Dudorov, B. V. Mill', and R. V. Telesnin	589	245
The Electrodes for Anode Oxidation of Semiconductors – V. V. Zaddé and A. K. Zaitseva	592	248
Carbon Thermometers for Ultralow Temperatures – K. N. Zinov'eva and G. É. Karstens	594	249
Calculation of the Calibration Curves of Low-Temperature Resistance Thermometers on an Electronic Computer – V. N. Kopylov and L. P. Mezhov-Deglin	598	252
A Nitrogen-Vapor Thermostat with Electronic Control – A. V. Parshin and V. S. Sklyarenko	600	254
A Temperature Controller for Investigation of Thermally Stimulated Luminescent Phosphors – V. M. Khulugurov, A. A. Matveev, and L. I. Ruzhnikov	603	257
A Technological Laser Installation with Program Control – A. N. Sviridov, Yu. D. Tropikhin, and A. G. Kamenskii	606	260
ABSTRACTS		
Measurement of the Radioactivity of Liquified Gases – O. V. Il'ichev, V. M. Kolobashkin, V. P. Novichkov, and Yu. F. Pavlychev	609	262
Calculating the Sensitivity of Tissue-Equivalent Low-Pressure Proportional Counters – I. K. Kalugina, I. B. Keirim-Markus, A. K. Savinskii, I. V. Filyushkin, and O. N. Chernova	611	263
Measurement of the Correlation Intervals of Random Processes – A. V. Blokhin	613	264
REVIEWS OF INSTRUMENTS		
The Effect of the Earth's Magnetic Field on the Characteristics of FÉU-43 and FÉU-24 Photomultipliers – V. I. Moroz	615	265
An Attachment to the URS-50I X-Ray Diffractometer for Quantitative Phase Analysis – V. I. Bochenin	617	266
A Device for Moving the Aperture Iris in an Electron Microscope – S. V. Marun'ko and A. M. Prokopenko	620	269
A Reconstructed ÉG-100 Electron-Diffraction Camera for Investigating the Structure of Nonvolatile Compounds – A. A. Ivanov, V. P. Spiridonov, A. V. Demidov, and E. Z. Zasorin	622	270

Engl./Russ.

NEW INSTRUMENTS

An Electrical Integrator for Electron and Ion Optics – M. L. Aleksandrov, L. N. Gall', V. S. Krupnov, O. L. Lyubashev, and A. N. Pyatakin 626 273

Volume 17, Number 3, Part 1 May-June, 1974

Mass Spectrometry with Chemical Ionization (Review) – N. F. Volkov, G. V. Karachevtsev, A. Z. Marutkin, and A. I. Kholodov 631 7

NUCLEAR EXPERIMENTAL TECHNIQUES

The Vacuum Path of Linear Electron Accelerators and High-Frequency Separators – I. A. Prudnikov, V. V. Ryabov, G. L. Saksaganskii, and V. L. Smirnov 637 13

The "Tonus" High-Current Electron Accelerator – I. Z. Gleizer, L. P. Dronova, A. G. Zherlitsyn, G. I. Kotlyarevskii, B. V. Okulov, V. S. Tak, G. E. Remnev, N. S. Rudenko, V. A. Tuzov, V. I. Smetanin, Yu. P. Usov, and A. A. Shatanov 642 17

An Installation for Testing Electron Guns with Recuperation of the Particle Energy – M. A. Zav'yalov, V. I. Perevodchikov, G. G. Timofeeva, and K. A. Yumatov 646 20

A Superconducting Quadrupole Magnetic Lens with an Aperture of 30 mm – E. V. Geraskin, V. G. Grebinnik, V. A. Zhukov, V. Kh. Malyaev, A. P. Manych, and G. I. Selivanov .. 649 23

The Ferrite Deflector of a B-3M Synchrotron – A. P. Lysenko, A. A. Mikhailichenko, and V. F. Turkin 653 26

A Source of a Beam of Hydrogen Atoms – E. K. Izrailov 655 28

Obtaining Beams of Negative Hydrogen and Helium Ions by the Method of Charge Exchange in Sodium Vapors – G. I. Dimov and G. V. Roslyakov 658 31

A Complex Probe for Investigating Pulsed High-Current Electron Beams – V. I. Koroteev and A. A. Shishko 663 35

Parameters of the Synchrotron Beam of the Erevan Electron Accelerator in the X-Ray Range of the Wavelengths – A. I. Alikhanyan, Ts. M. Avakyan, P. A. Bezirganyan, I. P. Karabekov, M. A. Martirosyan, A. M. Kotsinyan, and S. S. Ovakimyan 667 39

Monitoring the Beam of Pulsed Neutron Sources – Sh. Deme and Kim En Ir 671 42

A Meter for Measuring the Average Current in a Pulsed Beam of Charged Particles by Means of a Magnetoinductive Sensor Operating in an Oscillatory Mode – M. B. Flekkel' 673 44

The Superposition Method of Recording in Neutron Diffraction – V. P. Glazkov, A. E. Golovin, V. A. Somenkov, S. Sh. Shil'shtein, and I. R. Éntin 676 47

Measurement of the Polarization of Recoil Protons in Elastic πp Scattering by the Double-Scattering Method – V. S. Bekrenev, V. A. Gordeev, A. P. Kashchuk, S. P. Kruglov, L. A. Kuz'min, A. A. Kulbardis, I. V. Lopatin, T. G. Makaev, L. F. Suvorova, V. V. Sumachev, I. I. Tkach, E. A. Filimonov, V. A. Shchegel'skii, and G. V. Shcherbakov 680 53

A Plunger Chamber for Measuring the Lifetimes of Excited States of Nuclei – M. A. Ivanov, I. Kh. Lemberg, and A. S. Mishin 684 53

Proportional Counters for a Measurement of Small Quantities of ^{14}C – A. I. Ivliev and V. A. Alekseev 688 56

Inclined Positioning of the SNM-17 Neutron Detector in Order to Increase the Efficiency of a Neutron-Diffraction Installation – V. V. Kelarev, M. P. Zykin, A. N. Pirogov, Yu. A. Dorofeev, and A. I. Kozlov 690 58

A Block of Ge(Li) Detectors Having a Large Volume – P. A. Svetashev, N. A. Skakun, A. G. Strashinskii, N. V. Serykh, and G. K. Khomyakov 691 58

A Gas Scintillation Detector for Soft X Radiation – S. Kh. Baron, B. I. Verkhovskii, and V. A. Sotnikov 693 60

Effect of an Initiator on the Stability of Scintillation Properties of Plastic Scintillators – I. G. Golutvina, L. Ya. Zhil'tsova, E. N. Matveeva, O. G. Rubina, I. M. Stoletova, and M. D. Shafranov 696 63

Calibration of Dosimeters for the Measurements of High Gamma-Radiation Intensity —N. F. Kopas' 699 66

ELECTRONICS AND RADIO ENGINEERING

Network for Collection and Transmission of Physical-Experimentation Data to an Electronic Computer—A. S. Nanasyan and A. T. Dadyan 701 68

Input of Analog Signals to the "Nairi-2" Electronic Computer—M. A. Ganapetyan and E. S. Sarkisyan 704 70

System for Digital Printout and Punching Out on Tape of Digital Information in the CAMAC Standard—M. P. Belyakova, Nguyen Fuk, E. Khmelevski, and L. A. Urmanova 707 72

A Converter That Converts Single Pulses Recorded on the Screen of a Memory Cathode-Ray Tube into a Code—L. V. Karklit, V. N. Psurtsev, and E. N. Tverdokhlebov 710 75

A Voltage Comparator Based on Integrated Microcircuits for Analog-Digital Converters with a High Interference Immunity—V. I. Koval'kov 713 78

A Circuit for Linear Charging of a Capacitive Storage Device—K. A. Kondrat'ev and V. I. Shchupak 716 81

A Digital Memory Block Based on Glass Ultrasonic Delay Lines—V. A. Rozovskii and I. V. Shtranikh 718 83

A 12-Input Majority Coincidence Circuit with Digital Takeoff—S. G. Basiladze, P. K. Man'yakov, and A. N. Parfenov 722 86

An INM-591 Trunk Display Device—E. Khmelevski 726 89

System of Counters in the CAMAC Standard—N. I. Zhuravlev, Nguyen Man' Shat, V. T. Sidorov, A. N. Sinaev, A. A. Stakhin, and I. N. Churin 728 91

A Magnetic Storage Pulse Counter—G. T. Chukavin 731 94

Analysis and Calibration of the Systematic Errors of a Television Pickup by Means of Electronic Computers—V. A. Klevalin, A. V. Petrakov, and V. M. Kharitonov 734 96

A Quadded Channel Based on Integrated Circuits for Proportional Chambers —S. G. Basiladze 737 99

A Pulsed Current Source with Energy Recuperation—G. I. Kugushev and M. D. Sukhachev .. 740 102

A Double-Tuned Current Generator with Electronic Amplitude Control—L. A. Kalina, P. A. Novysh, and T. B. Pavlova 742 104

The GTI-741 Cycling-Pulse Generator—A. P. Kryachko 745 107

Generators Producing Pulsed Voltage for a Transverse Discharge—V. N. Ishchenko, V. N. Lisitsyn, and V. N. Starinskii 747 108

A Transistorized Nanosecond-Pulse Generator—E. P. Nikolaev 750 110

Starting High-Voltage Generators at a Voltage of up to 1 MV by Means of Pulsed X Radiation—V. A. Davidenko, B. A. Dolgoshein, A. N. Lebedev, S. V. Somov, and V. N. Starosel'tsev 753 113

Suppression of Afterpulses of a High-Voltage Pulse Generator by Means of a Nonlinear Inductance with Ferrites—V. V. Zakutin, N. N. Nasonov, and A. M. Shenderovich 756 115

Modification of the Circuit of a Shaper Producing Pulses of Nanosecond Length —A. A. Rudenko 760 119

Stabilization of the Operating Point of Avalanche Transistors in Nanosecond-Pulse Shapers —S. M. Pintus, V. A. Primysskii, and S. A. Starostin 763 121

A Self-Oscillatory dc Amplifier with Frequency Control—V. A. Gonostarev and A. M. Kunitsa 765 123

A Logarithmic Amplifier—V. P. Golovkov, Yu. V. Zubritskii, and S. S. Shikhmanov 767 125

Matching the Characteristics of Field-Effect Transistors—A. V. Tyurev and E. I. Snetkov 771 127

Stabilization of an Alternating Voltage across a Load Connected after a Cable —N. I. Zakharova and Yu. G. Kochinev 772 128

A High-Frequency Phase Calibrator—S. R. Stefanov and E. M. Cherenkova 774 130

Engl./Russ.

Volume 17, Number 3, Part 2 May-June, 1974

Measurement of the Complex Permittivity of Strongly Absorptive Liquids — A. A. Dem'yanov, M. G. Semenov, and V. A. Tamarin 777 132
A Quasioptical Device for Rotating a Wave Beam — G. P. Veselkov, V. A. Labyntsev, and V. V. Meriakri 779 134
A Spectrometer for Double Ferromagnetic and Antiferromagnetic Resonances — Kh. G. Bogdanova and V. A. Golenishchev-Kutuzov 782 136
Correlometer for Investigating the Spatial Development of a Plasma Instability — B. I. Kanaev, V. V. Piterskii, and E. E. Yushmanov 784 138
The BT-1004 Thyristor Regulator for KVTMS-T Power Blocks — B. D. Omel'chenko 787 140

GENERAL EXPERIMENTAL TECHNIQUES

A Meter for Measuring the Ion Currents of a Mass Spectrometer with a Sensitivity Exceeding 10^{-20} A — G. M. Kukavadze, V. V. Trebukhovskii, and V. F. Konyaev 790 143
A Generator Producing Compensating Voltages for a Quadrupole Mass Spectrometer — V. S. Voronin 793 146
A Cryocondensation Booster Pump — V. E. Minaichev and V. M. Zykov 795 148
A High-Frequency Facula Plasmatron for Research in Plasma Physics and Plasma Chemistry — I. A. Tikhomirov, V. V. Tikhomirov, A. A. Solov'ev, V. Ya. Fedyanin, V. I. Shishkovskii, V. N. Sergeev, M. M. Pugovkin, and A. I. Kuz'minykh 799 151
Measurement of the Longitudinal Plasma-Density Gradient — A. K. Berezin, E. I. Belichenko, and V. A. Kiselev 802 153
A High-Voltage Tube with Recuperation of the Electron-Beam Energy — E. A. Abramyan and A. N. Sharapa 805 155
Measurement of the Time Characteristics of Photoelectron Multipliers by Means of Injection Semiconductor Lasers Based on GaAs — L. I. Andreeva, V. F. Kabanov, A. F. Kotyuk, V. F. Litvinov, V. V. Nikitin, L. N. Samoilov, A. S. Semenov, B. M. Stepanov, S. V. Tikhomirov, and A. I. Sharin 809 159
Choice of the Optimal Supply Mode of a Photomultiplier during Photon Counting — N. Sh. Kipnis 813 162
An Electroionization CO_2 Laser with a Radiation Energy of 2.5 J in a Pulse — Yu. I. Bychkov, I. N. Konovalov, Yu. A. Kurbatov, and V. M. Orlovskii 817 165
A Laser for the Infrared Range Based on Iodine Vapors — Yu. E. Kamenev, E. M. Kuleshov, and L. P. Demina 820 167
A Stabilizer for Stabilizing the Radiation Power of a Laser Oscillator — I. N. Govor and V. M. Nesterenko 822 168
The Effect of Self-Cleaning of Brewster Windows in a He + Se Laser — N. V. S"botinov 824 170
A Pulsed Cavity Tube with a Spiral Discharge Channel — Yu. G. Basov and M. Yu. Vorob'ev .. 825 171
The Efficiency of Parametric Conversion of Light Frequency in Nonlinear Crystals — V. A. Kudryashov, I. M. Matveev, S. M. Pshenichnikov, N. P. Sopina, and N. V. Filyushkin 828 173
An Installation for Relative Measurements of Laser Wavelengths in a Wide Spectral Range — B. L. Bukovskii, L. G. Vasil'eva, L. A. Sakaeva, Yu. F. Tomashevskii, A. K. Toropov, and Yu. A. Fedorov 831 175
Integrated Holographic Multiposition Transporable Instruments — D. I. Mirovitskii, I. F. Budagyan, V. F. Dubrovin, and V. S. Chagulov 834 178
A Photoelectric Microscope with an Acoustooptic Image Analyzer — V. I. Teleshevskii and B. M. Potapov 839 182
A Photoreceiver Based on a Photoelectron Multiplier with a Controllable Output Current — G. D. Petrukhin and Yu. Yu. Martyushev 842 184
Investigation of Fiber Image Amplifiers — V. L. Koval'chuk, V. P. Konarev, I. N. Matveev, and S. M. Pshenichnikov 844 186
Use of an Electronic Computer in Investigating Luminescence Kinetics — A. P. Vetrov and B. A. Okhrimenko 846 188

	Engl.	Russ.
Installation for Transillumination of a Nonstationary Plasma at a Stipulated Time – V. I. Tarasov, I. S. Fishman, and E. I. Shitov	850	191
A Ten-Channel Polychromator for Studying the Shape of the Spectral Lines of a Nonstationary Plasma – S. V. Antipov, M. V. Nezlin, E. N. Shezhkin, A. S. Trubnikov, and I. F. Khanov	852	193
Measurement of the Thicknesses of Transparent and Nontransparent Films – M. M. Kondratenko and A. I. Malik	855	196
An Installation for Investigating the Contact-Mechanical Properties of Powdered Materials under Vacuum Conditions – B. V. Deryagin, Yu. P. Toporov, and V. V. Shandor	857	198
A Device for Separate Feed and Mixing of Chemically Interacting Gases – V. A. Dudkin and V. B. Rukhin	860	200
Piezometer for Measuring the Volume of Chemically Active Substances – I. N. Makarenko, V. A. Ivanov, and S. M. Stishov	862	202
Method of Thermal Analysis of High Pressure – I. Yu. Ignat'eva, A. K. Butylenko, and N. A. Bendeliani	865	204
Installation for Mössbauer Investigations at High Hydrostatic Pressures – D. B. Balashov, V. S. Vartanov, B. G. Zamskov, and E. F. Makarov	867	206
A Pulsed Device for Producing Hard X Radiation – E. I. Bichenkov, V. V. Polyudov, R. L. Rabinovich, and V. M. Titov	870	208
Cryostat for X-Ray Reflection Photography in a Widely Diverging Beam – A. A. Boiko and I. M. Shmyt'ko	873	211
An Automatic Installation for Investigations of the Pyroeffect – Yu. L. Kopylov	875	213
An Infrared Introscope with a CO_2 Laser for the Investigation of Microinhomogeneities of the Structure of Semiconductors – V. T. Prokopenko and A. D. Yas'kov	878	215
Cells for the Investigation of the Electrophysical Properties of Powdered Semiconductors – T. I. Povkhan, K. B. Demidov, and I. A. Akimov	881	217
The Hypersonic Method of Investigating the Photodielectric Effect in Semiconductors – E. M. Ganapol'skii and V. V. Tarakanov	884	219
Obtaining Ohmic Contacts Based on Semi-Insulated GaAs – N. G. Fomin, Yu. V. Vorob'ev, and O. V. Tretyak	887	222
Measurement of the Thickness of a Gold Contact on Silicon Nuclear-Radiation Detectors – L. S. Gatsenko, T. M. Golovner, and O. V. Zakharchuk	889	224
Obtaining Foils and Films of Selenium, Germanium, and Manganese Isotopes for Nuclear Research – T. S. Nazarova and A. A. Rozen	892	226
A Step Switch Based on Vacuum-Tight Contacts – V. I. Povstugar and A. I. Efimenko	894	227
A Device for Microdisplacement of the Object Table of a Microscope – V. V. Chekanov and A. D. Eremeev	895	228
A Simple Thermal Controller Based on Thyristors – V. A. Ivanov, I. N. Makarenko, and V. I. Fedosimov	896	228
A Miniature Flexible Thermocouple for Measuring Temperatures of up to 800°C – A. A. Fraktovnikova, G. I. Gushchin, and I. P. Maslov	898	229
A Vacuum-Tight Compact Thermocouple – A. K. Fedyukovich and Yu. V. Vidin	901	232
Glue Compositions for Cryogenic Devices – V. V. Shapovalenko, E. I. Gol'dshtein, M. V. Pomoshnikova, and L. I. Voitenko	963	233
ABSTRACTS		
Three-Meter Magnetic Spectrometer of the Institute of Theoretical and Experimental Physics – I. A. Dukhovskoi, V. V. Kishkurno, A. P. Krutenkova, V. V. Kulikov, V. N. Luzin, I. A. Radkevich, V. V. Sokolovskii, V. S. Fedorets, and B. M. Yakovlev	905	235
Pickup for Sensing the Signal of an ESR Spectrometer Based on a Meander Slow-Wave Line – E. A. Sokolov, V. P. Sazonov, V. A. Benderskii, and A. S. Klimenkov	907	236
REVIEWS OF INSTRUMENTS		
Improving the Resolving Power of an End-Type Proportional Counter for Recording Soft Gamma Radiation – A. G. Beda and A. V. Davydov	909	237

Engl./Russ.

Matching a TsPM-4 Digital Printer to Transistorized Digital Meters – Z. M. Berdichevskii and V. N. Kaikov 911 238
A Device for Interfacing the UR-20 Infrared Spectrometer with the "Dnepr" Electronic Computer – L. V. Gavrilyuk, A. T. Mizernyuk, N. G. Nikishina, V. B. Reutov, and M. B. Stepko 913 239
Use of PTTR Thyristor Converter as a Controllable Source of Current for an Electromagnet – A. D. Skokov, N. N. Potapov, and Yu. I. Krasavin 915 240

NEW INSTRUMENTS

The ASA-I, ASA-Z, and ASA-V Filter Automatic Spectrum Analyzers – N. F. Vollerner, V. G. Kriksunov, V. N. Sukharev, V. V. Bergulev, B. A. Boichuk, I. V. Latenko, G. A. Levin, E. I. Sikorskii, V. M. Userdnyi, and V. K. Chelpanov 917 241

Volume 17, Number 4, Part 1 July-August, 1974

Current Leads for Cryogenic Devices (Review) – Yu. L. Buyanov, A. B. Fradkov, and I. Yu. Shebalin 929 5

NUCLEAR EXPERIMENTAL TECHNIQUES

Installation for Investigating the Acceleration of Electrons in Superconducting Accelerating Systems – E. Z. Biller, É. S. Zlunitsyn, A. I. Zykov, and V. A. Kushnir 940 15
Testing of an Injector with a Field-Emission Cathode on an Accelerator – R. M. Voronkov, V. F. Gass, V. A. Danilichev, and I. A. Smirnov 944 18
Synchrotron Radiation Path for Vacuum Ultraviolet Spectroscopy – A. N. Didenko, A. V. Kozhevnikov, M. M. Nikitin, and N. A. Timchenko 948 20
Use of Coreless Inductors for Obtaining and Transporting an Electron Beam Having a Pulse Current of Up to 25 kA – A. I. Pavlovskii, A. I. Gerasimov, V. A. Tananakin, and E. G. Dubinov 951 23
Measurement of the Charge of a Pulsed Beam of Accelerated Electrons – A. M. Andreev, A. I. Borodulin, V. M. Rybin, E. A. Tsygankov, A. P. Tsyplyakov, and V. P. Shestak 956 27
Features of the Interaction of an Accelerated Beam with the Internal Targets of a Proton Synchrotron – V. I. Nikolaev 959 29
A Helium Target – Yu. T. Borzunov, L. B. Golovanov, and A. P. Tsvinev 963 32
Chamber for Studying Channeling and Shadow Effects – V. G. Zlobin, V. M. Kolyada, and B. E. Legkov 967 35
Spark Detector for Recording Recoil Nuclei in Intense Beams of Gamma Quanta – L. A. Zhirova, G. K. Megrabyan, and R. N. Pikhtelev 969 36
Operations of Proportional X-Ray Counters at Gas Multiplication Factors Close to Unity – D. A. Goganov, V. P. Gimanov, and A. G. Guslina 972 39
Temperature Dependence and Characteristics of Ionization Chambers with a Liquid Dielectric – V. I. Ivanov, E. D. Kleshchenko, and V. V. Frolov 975 41
Ion-Doped Silicon Detectors for Recording Soft Electrons – É. É. Akhmerov, R. A. Muminov, O. Nigmanov, and U. V. Shchebiot 979 43
Spectrometric Charged-Particle Detectors Based on a SnO_2–Si Heterojunction – V. M. Vakhtel', V. M. Gorozhankin, I. I. Evseev, A. M. Intsertov, V. V. Kryachko, L. N. Sukhotin, and V. F. Synorov 981 44
Completely Depleted Drift Detectors – L. S. Gatsenko and O. P. Fedoseeva 984 46
Silicon Surface Barrier Detectors Having Low Leakage Currents – L. Gumnerova, B. P. Osipenko, L. A. Permyakova, and N. M. Prakhov 986 48
Characteristics of a Detector Having a Transition-Radiation Radiator in the Proportional Counter at an Electron Energy of 40 GeV – A. I. Alikhanyan, S. A. Kankanyan, A. G. Oganesyan, and A. G. Tamanyan 990 51
Ann–γ-Separation Circuit for a Flow-Neutron Liquid Scintillation Detector – N. N. Semenova and V. Ya. Kitaev 992 53
Adjustable Monochromator in a Neutron Spectrometer – Ya. G. Gross and N. M. Okuneva 996 56

ELECTRONICS AND RADIO ENGINEERING

Circuit for Controlling Blocks of Fast Electronic Circuitry in the CAMAC Standard from an Electronic Computer — V. A. Aref'ev and S. G. Basiladze	998	58
Organization of the Input of Random Signals (Processes) into an Electronic Computer — M. V. Mironenko and M. S. Titkov	1001	60
Transmission of Digital Information over a Single Coaxial Communication Line — L. M. Dykhnenko and E. V. Proskurin	1004	63
Utilization of Information-Compression Methods in Experiments of Gamma–Gamma Coincidences — K. Ya. Gromov, Z. Zaidler, S. I. Ormandzhiev, V. I. Fominykh, M. I. Fominykh, and V.M. Tsupko-Sitnikov	1006	64
An Amplitude-Digital Converter with 8192 Channels and Equalization — A.I. Gonchar, S.I. Chubarov, and B. V. Nesterov	1011	69
An Analog-Digital Current — Frequency Converter with Six Decimal Places — V.F. Kudryashov and A.I. Shaks	1015	72
A Broadband Linear Current — Frequency Converter — I. A. Karapatnitskii, I. V. Kolchin, and I. I. Uvarov	1018	74
A Stabilized Voltage Converter — V. I. Voronin	1021	76
A Memory Device for Null-Drift Compensation Circuits in DC Instrument Converters — I. D. Goncharenko and I. A. Yatsun	1023	77
A Capacitive Time-Interval Converter — V. A. Golovko, Z. V. Magrachev, and N. N. Tishchenko	1026	80
Instrument for Recording One-Shot Signals — E. P. Petrov	1029	82
A 2-MV Pulsed Electrovacuum Installation — I. I. Kalyatskii, G. M. Kassirov, and G. V. Smirnov	1032	84
A Generator That Produces Groups of Short Rectangular Pulses of High Amplitude — A. P. Williams, V. A. Skubko, and V. V. Krasnyi	1035	86
Generator Producing Nanosecond Pulses with an Increased Repetition Frequency — I. G. Kataev and I. I. Rozhkov	1037	88
A Shaper Producing Powerful Pulses Which Is Based on Avalanche Transistors — V. P. D'yakonov, S. I. Zienko, and A. M. Remnev	1039	89
A Controlled Spark Gap — G. S. Korshunov, V. V. Khmyrov, V. F. Vazhov, and M. T. Pichugina	1042	92
Modifications of the Trigger with Emitter Coupling — I. A. Lednev	1045	94
A Precision Gated Pulse-Amplitude Meter — A. N. Zimarev and V. A. Sergeev	1048	96
Compensation Method of Measuring Pulsed Current and Voltage — L. A. Luk'yanchikov and G. I. Kiselev	1052	99
A Bipolar Peak Detector — V. A. Sukatskas	1054	100
A Multirange Phase Meter with the Measurement Ranges ± 180, ± 360, ± 720, ± 1440° — V. E. Ryadchikov and B. P. Sokolov	1056	102
Differential Infralow-Frequency Spectrum Analyzer — P. A. Klyushkin, V. V. Semenov, and V. N. Toisev	1058	104
Instrument Which Measures the Integral Distribution Function of Broadband Random Processes — G. E. Smetanin and E. V. Mironov	1062	107
Heterodyne Block for a Correlational Receiver — V. G. Arkhangel'skii, P. A. Kapustin, and A. A. Petrovskii	1064	109
Ultra-Broad-Band Microwave Directional Couplers — A. A. Gitel'son and S. V. Orlov	1068	112
Dynamic Method of Measuring the Q of Dielectric Resonators and the Dielectric Loss-Angle Tangent of Ferroelectrics in the Decimeter Range of Wavelengths — I. M. Buzin and I. M. Angelov	1070	114
Millimeter-Range Resonator for an ESR Spectrometer — S. N. Lubin, É. D. Nemchenko, and L. G. Oranskii	1073	116
Measurement of the Complex Permittivity of a Medium in a Waveguide Using the Method of Two Transverse Slits — V. V. Panenko	1076	118
Unit for Investigation of Radio-Wave Scattering — V. G. Glagolevskii and Yu. A. Shishov	1080	121

Volume 17, Number 4, Part 2 July-August, 1974

External Preamplifier for Piezoelectric Measurement Transducers — V. N. Pavlov 1083 123
A Paraphase Sweep-Voltage Amplifier for the LI-602 Dissector — G. D. Bogomolov and V. I. Voronin 1085 124
Circuit for Controlling a Streak Camera — A. F. Medvedev and M. M. Nikitin 1087 126
Fast-Electron Recorder Based on Measurement of the Ratio between Two Light Fluxes — K. L. Leont'ev, N. A. Khor'kov, and N. G. Rambidi 1090 128
A Stabilized Controller for Regulating the Electric Heating of the Cathode of a Thermionic Converter — L. Ya. Garber, R. V. Kal'manovich, and M. M. Karpenko .. 1093 130
Compensation of the Temperature Instability of a Reference-Voltage Source by Means of a Current — O. N. Averbukh, D. I. Stepanovskii, and A. I. Khandozhko 1096 132

GENERAL EXPERIMENTAL TECHNIQUES

Installation for Mass-Spectrometric Analysis of Gas Impurities in Crystals and Glasses — I. I. Cheremisin and A. G. Boganov 1098 134
Deposition of Homogeneous Coatings on Hemispherical Surfaces — L. B. Panfilova and Yu. F. Skachkov 1103 138
Gas Generators for Powerful Spark Gaps — V. K. Bocharov and V. M. Lunev 1106 140
Installation for Investigating the Energy Distribution of Thermoelectrons in a Pulsed Mode — N. N. Kuznetsov and Yu. I. Nabokov 1109 142
Measurement of Plasma Potential according to the Time of Flight of Heavy Ions — S. A. Vdovin, A. A. Kalmykov, O. A. Lavrent'ev, V. A. Naboka, and Yu. I. Pankrat'ev 1112 145
Logarithmic Operating Mode of Photoelectron Multipliers — V. V. Bacherikov, Yu. A. Makarov, Yu. N. Nikolaev, and B. M. Stepanov 1116 147
Investigation of One-Electron Photomultipliers for the Ultraviolet Range — S. S. Vetokhin, I. R. Gulakov, and I. V. Reznikov 1120 150
Use of Photoelectron Multipliers in Investigating the Statistical Properties of Radiation by the Photon-Count Method — V. N. Nastich 1123 152
Characteristics of Channel Electron Multipliers with a Funnel at the Input — M. R. Ainbund, V. G. Kovalenko, and B. V. Polenov 1126 154
Investigation of the Zonal Characteristics of Channel Electron Multipliers with a Funnel — M. R. Ainbund, V. P. Pronin, and V. M. Stozharov 1129 156
Measurement of the Gain of Channel Multipliers and Microchannel Plates — A. E. Melamid, A. M. Potapov, and M. I. Smirnova 1132 158
Method of Measuring the Intensity Distribution of the Radiation in the Focal Spot of a Laser — I. M. Lipovskii, T. G. Rozanov, and L. A. Surmenko 1134 159
Discharge Tubes for Multicomponent Cataphoresis Lasers — I. G. Ivanov, V. G. Il'yushko, V. S. Mikhalevskii, V. P. Mukhanov, and M. F. Sém 1136 161
Synchronization of a Bank of Powerful Pulsed Light Sources — O. M. Batovskii 1138 162
Determination of the Color Temperature of Pulsed Radiation Sources — E. A. Eremin, E. T. Makhrov, B. V. Starikov, and I. I. Yazev 1140 164
Instrument for Measuring the Energy and Power of Laser Radiation of Broad Light Beams — R. N. Arkhipov, V. N. Bochkarev, B. L. Vasin, and V. M. Krasovskii 1142 165
A Broadband Quartz Infrared-Radiation Receiver Having a Sensitivity of 10^{-9} W — A. G. Smagin and B. G. Mil'shtein 1144 167
Replicability of the Shape of a Light Pulse Using Coaxial Photocells — Z. A. Al'bikov, A. G. Berkovskii, Yu. A. Brusov, A. A. Gaidarenko, and O. V. Kozlov 1147 169
Use of Photochromic Glasses for Storage of a Periodic Signal with Noise — F. M. Subbotin and N. S. Tsukkerman 1149 171
A Highly Sensitive Twin-Wave Differential Spectrophotometer — V. N. Verkhoturov, V. A. Kalachev, and A B. Rubin 1151 172
Reflectors for the Interferometer of a High-Resolution Fourier Spectrometer — V. S. Bukreev, A. A. Balashov, and V. A. Vagin 1155 175

	Engl.	Russ.
Installation for Investigating the Magnetoeleastic Properties of Massive and Film Magnetic Substances — V. A. Domyshev and N. I. Luzgin	1158	178
Investigating the Variation of the Volume of a Thick-Walled Non-Unloaded Piezometer as a Function of Pressure — V. N. Zubarev, P. G. Prusakov, and V. V. Barkovskii	1161	180
Measurement of Deformation during Creep under a High Hydrostatic Pressure — V. I. Zaitsev, E. I. Lyafer, and I. K. Nosolev	1164	182
Use of an Interference Dilatometer for Measurement of the Piezoelectric Properties of Crystals — V. G. Zubov and M. M. Firsova	1166	183
A Laser Mechanical-Vibration Meter — Yu. P. Egorov and A. S. Petrov	1168	184
A Frequency-Angle Acoustooptical Converter — B. M. Potapov and V. I. Teleshevskii	1170	186
Use of Acicular Emitters in Electron Microscopy — R. I. Garber, A. K. Malik, and I. M. Fishman	1173	188
Use of Microchannel Intensity Amplifiers in an Autoionic Microscope — V. I. Kirienko, V. K. Latyshev, N. V. Nikonenkov, L. P. Potapov, V. I. Saprykin, I. V. Siprikov, and A. M. Yakobson	1176	191
Definition and Measurement of Means of Filtered X Radiation — M. Ya. Grudskii, A. V. Malyshenkov, and V. V. Smirnov	1179	193
Instrument for Measuring the Thickness of Semiconductor Epitaxial Films on the Low-Ohm Substrate — Yu. E. Gordienko, V. V. Starostenko, Yu. A. Dudkin, and V. E. Shevchenko	1183	196
Determination of the Spreading Resistance Near a p—n Junction — Yu. P. Boitsov, T. V. Garkusha, and G. I. Kostousova	1186	198
Properties of Ohmic Contacts with Gallium Antimonide Single Crystals That Have Been Grown by the Gas-Transport Reaction Method — V. P. Goncharov and Yu. A. Okhrimenko	1189	200
Temperature Pickups Based on Filamentary Silicon Crystals — S. A. Ammer, V. A. Eliseev, A. F. Tatarenkov, and A. A. Shchetinin	1191	202
Thermometer Made of GaAs for the 1 to 100 °K Range — S. P. Logvinenko, O. A. Rossoshanskii, V. V. Poladich, T. M. Zarochentseva, S. L. Derbysheva, and V. I. Eremenko	1193	203
Superconducting Quantum Interferometers Made of Thin Films — W. Richter and G. Albrecht	1196	205
Low-Temperature Device for Magnetoacoustic Investigations — A. P. Korolyuk, V. F. Roi, A. V. Golik, V. I. Beletskii, L. Ya. Matsakov, and M. A. Obolenskii	1199	208
Deposition of Aluminum Nitride Coatings on Refractory Metals — G. A. Lindenburg and V. G. Kharazov	1202	210
ABSTRACTS		
The PDP-9 Electronic Computer in the Control of an HPD Tape Transport Mechanism and as the Programming Electronic Circuitry of a Measurement Table for Processing the Photographs of Track Chambers — I. E. Vasinyuk, A. T. Dadyan, A. M. Zverev, G. A. Melik-Martirosyan, and A. S. Nanasyan	1204	212
The Hazar Program for a Geometric Reconstruction of Events in Bubble Chambers — V. V. Ammosov, L. N. Gerdyukov, P. A. Gorichev, N. S. Ivanova, É. P. Kistenev, S. V. Klimenko, and E. D. Shcherbakov	1206	213
Device for Recording the Parameters of Microparticle Motion on Punched Tape — V. V. Chekanov and G. I. Yaglo	1208	213
A Stroboscopic Adsorption-Time Meter — V. I. Mikhailov, N. I. Sosfenov, Yu. N. Lyubitov, and B. S. Uvarov	1209	214
An Electromechanical Scanner — A. T. Vasilenko, V. M. Soroko, and N. S. Frolov	1211	215
REVIEWS OF INSTRUMENTS		
The "Klest" Amplifier Expander in a Spectrometer for Soft X Radiation — N. V. Nikonenkov and V. N. Smirnov	1213	217
A Punching Attachment to the F-581 Transcriptor — N. I. Sergeev and N. V. Alekseev	1215	218
Correlation Attachment to a Multichannel Analyzer — L. I. Skorobogat	1217	219
Obtaining Fractional Division Factors by Means of the IK3-15 Counter Divider — A. N. Zelenin, A. V. Il'chenko, Yu. I. Skorokhodov, and N. K. Svergunenko	1219	220

Devices for Synthesizing High-Frequency Oscillations for Synthesis of the Working Frequencies of the RS-60M Radio Spectrometer – A. F. Verenik, F. V. Kiyanovskii, and A. N. Lyubimova 1220 220
The High-Frequency Section of a RYa2305 Radio Spectrometer for Recording Spectra of Various Nuclei – V. A. Ksenofontov and I. M. Ovchinnikov 1223 222
An Ion Receiver with an Energy Filter for the MI-1305 Mass Spectrometer – M. A. Vasil'ev, S. P. Chenakin, and V. T. Cherepin 1225 224
Attachment to the MV2302 Mass Spectrometer for Chemical Research – V. M. Prokop'ev, O. S. Boiko, and V. V. Kalygin 1227 225
Attachment to the MF-2 for Microphotometry of Opaque Samples – Yu. A. Bystrov and G. M. Persianov 1230 227
Universal Attachment for Performing Investigations by the Method of Disruptive Multiple Total Internal Reflection – Yu. N. Korolev, V. D. Lysov, and I. V. Tsibanova .. 1232 228

NEW INSTRUMENTS

A Counter Divider – A. N. Zelenin, N. K. Svergunenko, O. I. Gubernatorov, A. F. Ivanchenko, and A. G. Dovbnya 1235 231

Volume 17, Number 5, Part 1 September-October, 1974

Fission Fragment Counters (Review) – Yu. P. Gangrskii, B. N. Markov, and Yu. M. Tsipenyuk .. 1245 7

NUCLEAR EXPERIMENTAL TECHNIQUES

An Electron-Beam Generator Having a Low Characteristic Resistance of the Impulsing Circuit – A. I. Pavlovskii, G. D. Kuleshov, A. I. Gerasimov, and V. A. Tananakin 1259 20
A Three-Electrode High-Perveance Electron Gun for Defining Tubular Beam – N. S. Zinchenko and V. A. Sokolova 1263 23
An Electron Gun with a Cold Cathode for Producing Currents of Approximately 10^5 A in a Pulse – D. V. Iremashvili, S. V. Kuril'nikov, and T. A. Osepashvili 1266 26
A Source of Doubly Charged Helium Ions for an Electrostatic Accelerator – Yu. M. Khirnyi and L. N. Kochemasova 1269 28
A Source of Negative Ions – V. P. Golubev, G. A. Nalivaiko, and S. G. Tsepakin 1272 30
Determination of the Composition of the Beam from the Meson Path of a Synchrocyclotron – A. V. Kuptsov, G. I. Smirnov, and D. M. Khazins 1275 32
Certain Modifications of Electromagnetic Quadrupole Lenses – G. N. Samsonov 1278 35
Spectrometric Possibilities of a Doublet of Quadrupole Lenses – V. M. Breev, M. M. Kats, N. P. Mel'nikov, and A. P. P'yankov 1281 37
A Multisphere Spectrometer with a Semiconductor Thermal-Neutron Detector – V. P. Semenov, L. A. Trykov, and Yu. V. Fadeev 1285 40
Investigation of the Conservation of Spark Tracks for Dual Pulse Supply with Pulses Having Alternating Signs – K. M. Avakyan, T. L. Asatiani, V. A. Ivanov, V. M. Krishchyan, and É. M. Matevosyan 1289 43
Calculation of the Tension of the Wires in Proportional Counters – V. I. Tel'nov 1292 46
Laminar Scintillators for Fast-Neutron Spectrometry – E. M. Burymov, N. V. Orlova, and I. B. Teplov 1295 48
Concerning the Minimal Thresholds of Circuits for the Separation of Neutrons and Gamma Rays – V. A. Dulin 1299 51
The Effect of Radiation on the Luminescence of Plastic Scintillators – Yu. A. Kulinich, V. G. Rukavishnikov, and M. T. Chineikin 1302 54
A Silicon Gamma-Radiation Dosimeter with an Increased Radiation Durability – A. P. Galushka and V. K. Dubovoi 1305 56

ELECTRONICS AND RADIO ENGINEERING

Discrete Scanning Device for Automation of Physics Research – S. S. Kolosov, Yu. I. Leonov, and L. N. Litvinenko 1307 58

	Engl.	Russ.
Recording of Neutrons under Conditions of Intense Beta–Gamma Background – V. A. Anikolenko, A. V. Antonov, A. I. Isakov, A. D. Perekrestenko, and A. A. Tikhomirov	1310	60
A Shape Discriminator for Pulses from a Combined CsI(Tl)–NaI(Tl) Scintillation Detector – Yu. S. Belle and V. I. Korovin	1313	62
High-Frequency Voltage–Frequency Converters Based on Avalanche Transistors – V. P. D'yakonov, V. I. Orlov, A. M. Remnev, and A. S. Ul'yanov	1317	66
Converters that Convert a Resistance to a Frequency–Time Signal Using Heteropolar Current Sources – I. F. Ostrovskii and M. P. Shadrin	1319	68
Double Utilization of a Comparison Amplifier in Order to Increase the Accuracy of Analog-Digital Converters – A. Kh. Mursaev	1322	70
A Counting Decade with Digital Display – V. E. Khodakov, V. P. Grinenko, and V. S. Bulavin	1324	72
Ring Potential Counters Based on Integrated Circuits Operating at 140 MHz – S. G. Basiladze	1327	74
High-Speed Circuit of a Counting Channel for Parallel Connection of Halide Gamma Quantum and Beta-Particle Counters – B. M. Kolesov, G. I. Ganichev, V. A. Efimov, A. N. Shishmolin, and A. K. Ovchinnikov	1329	76
A Coincidence Circuit with a Selection Element Based on a Standard Photoelectron Multiplier – V. V. Koshtoev	1332	78
A High-Speed Ring Shift Register – V. S. Simonov and V. G. Shapoval'yants	1334	79
A Four-Channel System for Stabilizing a Scintillation Gamma-Spectrometric Installation – Yu. S. Belle, V. P. Volchok, and V. I. Korovin	1337	82
A Powerful Thyristor Modulator – N. M. Gavrilov, B. M. Kozuev, and A. V. Stupin	1340	84
A Generator of High-Voltage Pulses Having a Rectangular Shape – É. N. Abdullin and V. G. Shpak	1342	86
An Infra-Low-Frequency Pulse Generator – A. A. Bragin, V. S. Orlov, and A. I. Strashkevich	1345	89
System for On-Line Monitoring of the Operation of Controlled Spark Gaps – D. G. Baratov, V. V. Vasil'ev, and Yu. N. Shafirin	1347	91
A Shaper That Produces Short Pulses across a Capacitive Load – L. Z. Gogolitsyn	1350	93
A Pulse-Amplitude Stabilizer – M. P. Shadrin and Yu. V. Shishkov	1352	95
A Stable Pulse Amplifier with a Large Dynamic Range of the Input Signals – F. G. Cherkasov, A. M. Sokol'vyak, and B. A. Gusev	1354	96
A Pulse Amplifier That Is Stable Relative to Overloads – I. M. Pribylovskii, A. L. Podmoshenskii, A. I. Efremov, and V. S. Petrov	1356	97
An Instrument for Measuring the Power Flux Density at Ultrahigh Frequencies – V. A. Antropov, L. Kh. Antropova, V. V. Kirillov, N. V. Kotosonov, and Ya. L. Khlyavich	1359	99
A Voltage-Controlled Attenuator – I. A. Belozerov, G. G. Andrianova, and G. I. Prokopenko	1362	101
A Transistorized Frequency Divider for Ultrahigh-Frequency Signals – V. V. Bashkatov, B. V. Kalinin, and V. S. Korzinkin	1365	103
Method of Measuring Differential Phase Shift at Microwave Frequencies – A. A. Gitel'son	1367	105
An Installation for Studying the Field Distribution in the Millimeter and Submillimeter Ranges in Evacuated Open Cavity Resonators – I. M. Balaklitskii, V. G. Kurin, B. K. Skrynnik, and V. P. Shestopalov	1370	107
Increasing the Resolving Power of a Submillimeter Radiospectroscope with a Backward Wave Tube and an Acoustic Detector – A. N. Val'dov, L. I. Gershtein, E. N. Karyakin, A. F. Krupnov, and A. V. Maslovskii	1373	110
A Membrane Modulator for Spectra Radiometers in the Submillimeter Range – Yu. I. Kolesov and V. N. Listvin	1376	112
An Electron Spin Resonance Spectrometer, for Simultaneous Observations of Dispersion and Absorption Signals – A. I. Pristupa and D. I. Kadyrov	1379	114
A Transistorized Spectrometer with Automatic Follow-Up of the Nuclear Quadrupole Resonance Line – V. P. Anferov, V. S. Grechishkin, M. I. Krukover, M. Z. Yusupov, and A. M. Babkov	1383	117

Logarithmic Circuit with a Digital Output for Measurements of a Charge $\geq 10^{-14}$ C and for Determination of Its Sign — V. D. Butenko, Yu. P. Gordeev, V. V. Mel'nikov, B. I. Savin, and B. M. Yakovlev 1385 118
Self-Compensating Converter for Converting a Peak Voltage to a Slowly Varying Voltage — V. I. Voronin 1388 121
A Frequency Information Converter for Pulsed Ultrasonic Devices — Yu. M. Kafarov 1390 122
An Emitter Follower for Takeoff of Pulse Signals from High-Ohm Semiconductor Pickups — V. A. Kaminskas, P. A. Meizhis, and A. S. Pauzha 1392 124
A Gas-Discharge Device for Contactless Current Measurements — Yu. A. Bystrov and Yu. F. Radchenko 1394 125

Volume 17, Number 5, Part 2 September-October, 1974

Frequency Correction to 10^{-8} by Ruby Laser for Precision Quartz Crystals — A. G. Smagin 1397 127
A Character Generator Based on Digital Elements — I. I. Zadubovskii, B. N. Krasnogolovyi, and V. D. Rudenko 1399 129
An Oscillator with a Stabilized Output Voltage for a Quadrupole Mass Spectrometer — G. A. Berezhnoi and E. Ya. Mel'nichuk 1402 131
A Microthermostat — B. G. Ignatov, A. L. Aleksandrov, and Yu. N. Lyakhov 1404 133

GENERAL EXPERIMENTAL TECHNIQUES

An Emitter with Germanium Whiskers for Field-Effect Mass Spectrometry — V. I. Faerman, G. G. Devyatykh, I. L. Agafonov, and B. S. Kaverin 1405 135
Beam Composition from a Zeolite Source of Cs Ions — S. Mróz, S. Kaszczyszyn, and L. Zylka 1407 137
Improved Sensitivity in Omegatron Gas Analysis from Amplitude Modulation of the High-Frequency Field — V. S. Makeev, A. A. Yastrebov, and G. I. Zhuravlev 1409 138
Small Getter Ion Pump with an Erbium Evaporator — R. G. Varnakova, A. G. Grushnikov, A. S. Nazarov, and M. B. Silaev 1412 141
Use of Silicone Liquid in a Very High Vacuum System — V. I. Ivashkin, G. I. Slobodenyuk, and I. G. Blinov 1415 144
Velocity Selector with 10-mm Rotor-Flight Length for the Molecules of Involatile Substances — A. M. Zatselyapin 1417 145
Stabilization and Control of the Mode of Operation of Gas-Discharge Electron Sources — V. I. Mel'nik and G. Ya. Lubinets 1420 147
A Device for Studying the Statistics of Secondary Electrons in Emission Processes — N. N. Trofimchuk, M. P. Lorikyan, and R. L. Kavalov 1422 149
One-Electron Pulses and the Pulse Performance of FÉU-64 and FÉU-79 Photomultipliers — F. M. Subbotin and E. I. Shubnikov 1425 151
Changes in Pulse Characteristics of FÉU-86 in the Case of Long Storage — A. E. Melamid and A. M. Potapov 1427 152
A Laboratory Spectrofluorimeter for Free-Film Specimens — V. I. Anisimov, T. N. Zhuchkova, O. N. Karpukhin, I. V. Krinskii, S. M. Petukhov, and A. A. Khokhlov 1429 154
An Automatic System of Spectral Data Processing — S. S. Gusev and V. I. Golovachev 1431 156
Frequency Stabilization of a 3.39-μ He+Ne Laser — I. P. Konovalov and E. D. Protsenko 1433 158
Laser Heterodyne and Transmitter Automatic Frequency Control System — N. G. Borzunov, L. N. Popov, and B. N. Pizmer 1437 161
Use of a Photoelectron Multiplier with a Dynamic Converter in the Frequency-Stabilization System of a Laser — V. P. Kapralov 1439 162
Meter for Determining the Energy of Ten-Micron Pulses of Radiation with Intensities Far in Excess of Megawatts — E. K. Karlova and G. P. Kuz'min 1443 165
Multiframe Ultrahigh-Speed Schlieren Photography in a Ruby Laser Beam — Yu. A. Zakharenkov and A. S. Shikanov 1445 166

	Engl.	Russ.
Photogoniometric and Holographic Recording of the Surface Relief of Crystals — V. D. Zamozhskii, A. T. Verevkin, and V. N. Vertoprakhov	1449	169
Determination of the Refractive Index of Photoconductive Materials — N. K. Kiseleva and B. T. Kolomiets	1452	171
Use of Spatial Phase Modulation in Interferometers for the Study of Transparent Media — É. I. Krupitskii and V. S. Émdin	1455	173
A Cavitation Chamber for Counting Very Small Absorbing Particles in a Liquid — A. V. Butenin and B. Ya. Kogan	1458	175
Pulsed Solenoids for Obtaining Magnetic Fields of Up to 450 kOe — Yu. K. Katrukhin, L. I. Zelikman, and A. I. Vorokhov	1461	177
Application of Superconducting Shields to Increase the Uniformity of Solenoid Magnetic Fields — Yu. F. Bychkov, O. B. Tarutin, and V. Yu. Uzlov	1463	179
A Magnetic-Field Probe Based on a Double-Collector Magnetic Transistor — I. M. Vilukin, M. A. Glauberman, and L. F. Vikulina	1466	181
Apparatus for Tensile Testing under Pressure up to 15 kbar — V. I. Zaitsev, E. I. Osyka, I. M. Marchenko, V. G. Synkov, and G. Ya. Akimov	1468	183
A Film-Type Capacitative Electromechanical Transducer — E. I. Tokmakova, V. G. Evdokimov, and S. S. Sekoyan	1471	185
Optical Heterodyne Method of Measuring the Change in the Velocity of Ultrasound in Crystals — A. F. Levites, K. A. Minaeva, B. A. Strukov, and V. I. Teleshevskii	1473	187
A Small Pulsed Tube for X-Ray Radiography — É.-G. V. Aleksandrovich, N. V. Belkin, N. A. Dron', and G. N. Sloeva	1476	189
Source of Nanosecond Soft X-Ray Pulses — N. G. Pavlovskaya, L. V. Tarasova, and S. L. Él'yash	1478	190
Device for Excitation of X Rays in a Supersonic Gas Stream — P. S. Pogrebnyak, Yu. A. Pavlenko, É. T. Verkhovtseva, Ya. M. Fogel', and V. F. Udovenko	1481	193
A Differential Counter for X-Ray Structural Analysis — D. M. Vasil'ev, V. D. Verbitskii, and Yu. F. Titovets	1484	195
A Low-Voltage Electron Diffraction Camera for Surface Studies — B. M. Zykov, D. S. Ikonnikov, A. G. Kudziev, and R. R. Shvangiradze	1486	197
A Multipurpose Collector System for a Scanning Electron Microscope — V. G. Dyukov, É. I. Rau, G. V. Spivak, and A. A. Solov'ev	1490	200
Computer Interpretation of Autoion Images for Metals — A. F. Bobkov, A. M. Buz'ko, T. L. Razinkova, and A. L. Survorov	1494	203
An Apparatus for Measuring the Characteristics of Cathodoluminescence Screens and Electron-Sensitive Photographic Materials — N. P. Kupreichik and K. G. Predko	1497	205
An Apparatus for Examining Dynamic Piezoresistance — S. G. Kalashnikov, A. I. Morozov, and V. I. Fedosov	1500	208
A Cell for Examining Deformation Effects in Thin-Film Specimens — M. P. Volotskoi and V. I. Kaidanov	1503	210
A Direct-Reading Instrument for Carrier Mobility in Semiconductors — Yu. F. Sokolov, B. G. Stepanov, and N. I. Petrachenok	1506	212
Formation of Low-Resistance Ohmic Contacts for p-Type Zinc Telluride — P. A. Tupenevich, V. K. Kononenko, and A. K. Lyakhovich	1509	214
Tin Contacts to Silicon — V. I. Lisichenko, N. N. Petrichenko, and V. A. Pogorelyi	1512	216
An Apparatus for Growing Multilayer Epitaxial Gallium Arsenide Structures from the Liquid State — A. A. Barybin, A. A. Zakharov, and N. K. Nedev		217
An Interferometer for Inspection of Substrate Uneveness — A. N. Kotukov and A. I. Pekarev	1517	220
Measurement of Variable Pressure by Tunnel Diode — V. M. Smotritskii and F. S. Savitskii	1519	221
A Scanning Calorimeter Using Pyroelectric Detectors — M. B. Roitberg, I. A. Kleinman, A. Z. Rabinovich, V. V. Chechkin, and M. S. Chupakhin	1522	223
A Fast Microcalorimeter with Spiral Thermoelectric Elements — L. I. Anatychuk, V. I. Lakh, O. Ya. Luste, B. I. Stadnyk, and Yu. F. Red'ko	1525	225
A Superconducting Point Contact Adjustable in Helium — E. V. Antyukh and F. Ya. Nad'	1528	228

Engl./Russ.

Crysostats for Voltages of 120 and 220 kV — A. A. Vinogradov, V. A. Goncharov, V. I. Levitov, and V. Ya. Starobinskii 1530 229

DEPOSITED PAPERS

Silicon Semiconductor Detectors Made by Potassium Ion Implantation — V. M. Korol' and A. V. Protsenko 1532 231

The Response Functions of Telescopes Used in Cosmic-Ray Research — A. A. Kolchin, V. V. Lebedev, and G. P. Skrebtsov 1534 232

A Multichannel System for Recording the Shape of Light Signals — V. P. Kuznetsov, V. F. Kaptur, I. A. Malevich, A. F. Chernyavskii, and A. K. Yakushev 1535 232

REVIEWS OF INSTRUMENTS

Study of Secondary Ion Emission from Solids with the MI-1305 Mass Spectrometer — Sh. A. Magomedov, Ch. M. Chupalaev, and A. A. Guseinov 1536 234

An Ampoule Breaker for Mass Spectrometry — A. I. Toksubaev 1539 237

NEW INSTRUMENTS

Promethium-147 Nuclear Batteries with Silicon Converters — V. M. Kodyukov, A. A. Pustovalov, V. V. Gusev, A. A. Pochtakov, and L. T. Solodkin 1540 238

The State System of Industrial Goods and Instruments for Automation (GSP) (A new Collection of Standards) 1549 247

Volume 17, Number 6, Part 1 November-December, 1974

X-Ray Reflectometry (Review) — V. M. Sinaiskii and V. I. Sidenko 1551 5

NUCLEAR EXPERIMENTAL TECHNIQUES

Generalized Characteristics of the Oscillatory System of a Tuned High-Voltage Transformer for Supplying High-Current Pulsed Accelerators — S. M. Mezentsev, V. I. Mikhailov, and S. V. Naek 1559 14

A Pulse Circuit for Excitation of a Particle Accelerator Electromagnet — E. I. Lukonin, V. D. Semenov, and É. G. Furman 1563 17

A High-Voltage 500-kV Cable Input for an Electron Accelerator with a Thermionic Cathode — L. A. Vainshtein, M. A. Vlasov, V. V. Glebov, and D. N. Noyichkov 1565 19

Plasma Electron Source for an Electrostatic Accelerator — E. M. Vasil'ev, G. V. Zinger, Yu. E. Kreindel', L. P. Ponomareva, and V. P. Ponomarev 1569 22

Improved Injection Efficiency in Generating Short H^- Ion Bunches at a Linear Accelerator Input — A. P. Fedotov, V. V. Kushin, and V. I. Rogachev 1572 24

High-Frequency Modulation of Atomic Particle Beams for Plasma Diagnostics — P. A. Demchenko, L. I. Krupnik, K. A. Leontovich, and E. S. Lyangner 1574 26

Two-Meter Liquid-Hydrogen Target without Liquid-Nitrogen Cooling for Muon Experiments — L. M. Vasil'ev, Yu. P. Dmitrevskii, Yu. M. Mel'nik, A. F. Prudkoglyad, and V. V. Sytnik 1578 30

An Ironless Magnetic Quadrupole Lens with Circular Aperture — S. V. Skachkov 1581 32

Use of the PPI Microtron in Photonuclear Studies — A. I. Abramov, G. N. Ankin, V. T. Vasin, N. A. Klintsov, Yu. Ya. Stavisskii, V. F. Filyaev, and Yu. M. Choporov ... 1585 35

An Apparatus for Measuring the Integral Cross Section for Elastic Scattering of Ions at a Gas Target — V. I. Chigin' 1588 38

Neutron Polarization at High Angular Resolution — N. O. Elyutin, V. A. Somenkov, and S. Sh. Shil'shtein 1591 40

A Multicounter Recording System for a Powder Diffractometer — A. E. Golovin, A. P. Merzlikin, V. S. Vlasov, and V. P. Glazkov 1594 43

A Cryogenic Track Spark Chamber — Yu. V. Gorodkov, V. A. Lyubimov, I. A. Sidorov, and V. A. Soloshchenko 1597 46

		Engl./Russ.
Proportional Wire Chamber with Electronic Integration – A. V. Alekseev, A. A. Borisov, V. Yu. Glebov, K. I. Gubrienko, V. S. Kuznetsov, and I. R. Yampol'skii	1599	47
Use of Semiconducting Detectors in Radiation Dosimeters – P. N. Andreev and R. A. Filov	1602	50
Spectrometry of Alpha Particles Using Surface-Barrier Detectors at Low Temperatures – V. F. Kushniruk, A. V. Rykhlyuk, and Yu. P. Kharitonov	1604	51
Temperature Range of Efficient Operation of Cadmium Telluride Gamma Detectors – Yu. F. Rodionov and L. I. Kalugina	1607	54
High-Stability Halide Geiger–Müller Counters – A. I. Filatov, E. P. Kondrasheva, and V. G. Chaikovskii	1609	56
Compact Neutron Detector Consisting of a Bank of Proportional ^{3}He Counters – B. Bemer, A. A. Van'kov, Yu. V. Grigor'ev, K. Dittse, Kh. Kepernik, and A. G. Konyushkov	1611	57
Large-Volume BF_3 Neutron Detector – P. N. Vorona	1614	60
Use of a Silicon Resistor to Measure the Integral Fast-Neutron Flux Density – L. N. Patrikeev, B. I. Podlepetskii, and V. M. Fedchin	1617	62
Study of the De-Excitation of Scintillators by Statistical Methods – S. F. Kilin, Yu. P. Kushakevich, M. Z. Protasevich, and A. F. Chernyavskii	1620	64
Dependence of the Spectrometric Parameters of Scintillation Detectors on the Irradiation Geometry – O. P. Sobornov and O. P. Shcheglov	1623	67
Counter Plateau for NaI(Tl), CsI(Na), and CsI(Tl) Single Crystal Detectors in Mixed Fields – V. V. Chernikov, V. A. Sulyga, and Yu. A. Tsirlin	1626	69
Stabilization of a Scintillation Sensor Operating in the Counting Mode – A. S. Dubovenko, N. S. Pronkin, O. V. Rogozhin, and V. V. Khakhalin	1629	72
Properties of a Scintillation Resonance Detector for Mössbauer Investigations – D. K. Kaipov, T. A. Orazbaev, E. F. Galyutina, and L. S. Sergeeva	1633	75
ELECTRONIC AND RADIO ENGINEERING		
Analog Memory Device with an Additional Condenser – V. R. Fedorov, A. R. Fedorov, and A. M. Berenshtein	1636	77
A Digital Majority Coincidence System with Numerous Inputs – S. G. Basiladze and V. Ya. Gvozdev	1638	78
Derandomizing Devices – A. A. Eremin and A. V. Vasyanin	1641	81
A Nanosecond Controlled Delay Unit to CAMAC Standards – S. G. Basiladze and V. Tlachala	1644	83
A Digital Meter of Time Intervals with Picosecond Resolution and a Wide Dynamic Range – S. G. Basiladze, V. A. Smirnov, and V. Tlachala	1647	86
A Compensation Time-Scale Converter – V. A. Golovko, A. S. Kurashev, Z. V. Magrachev, and N. N. Tishchenko	1652	90
A Time–Amplitude Converter – Yu. V. Korshunov and V. I. Fominykh	1655	92
A Voltage–Amplitude to Time-Interval Converter – S. M. Telegin, V. N. Panteleev, and V. M. Shlyandin	1658	95
Threshold Analog-Frequency Converter – A. I. Alekseev and V. V. Boloznev	1660	96
Broadband Frequency Converter – I. P. Ryabokun'	1663	99
Transistor Microsecond Sweep Generator – V. P. Golovkov, V. I. Frolov, and S. S. Shikhmanov	1666	101
Tacitron Generator of Long High-Voltage Pulses – N. T. Gagin, V. F. Gnido, V. A. Krestov, and A. A. Nikolaev	1668	102
A Charge-Storage Device – S. N. Neustroev and A. K. Solov'ev	1670	104

Volume 17, Number 6, Part 2 November-December, 1974

A Fast Contact Breaker Based on Electrically-Exploded Wires – Yu. A. Kotov, N. G. Kolganov, and B. M. Koval'chuk	1673	107
Rectangular Pulse Generator Using a Single-Junction Transistor – V. P. D'yakonov	1676	109

Engl./Russ.

A Deflection-Current Generator for a Scanning Device — V. M. Tarasov, S. I. Panikovskii, and V. G. Abramov 1678 111
An Adjustable Stepped Sweep Source for Scanning Electron Microscopes and X-Ray Microanalyzers — G. L. Bel'kind, D. A. Novik, and M. I. Leiderman 1681 114
A Triangular Waveform Generator — B. A. Kotov and E. V. Kolla 1684 116
An Audio Generator with Precision Waveform and Amplitude Stabilization — B. A. Kotov and E. V. Kolla 1686 117
Remote Control of Amplitude of Pulse Signals — G. M. Mokina, V. S. Simonov, and V. S. Stepnoi 1688 119
A Wide-Band Transistor Amplifier of Nanosecond Pulses — M. V. Ten, Z. V. Magrachev, and V. Ya. Gyunter 1690 120
Broad-Band Preamplifier for Bolometers with High Internal Impedances — N. P. Ponomarenko and V. M. Zalkind 1694 123
Logarithmic Amplifier with AC—DC Input Voltage Conversion — S. K. Malyshev, V. V. Khrulev, S. P. Chekalev, and S. A. Shmulevich 1696 124
An Integrator for a Low-Frequency Voltage — A. G. Golovko and T. D. Shermergor 1698 126
A High-Sensitivity Integrating Electrometer — V. I. Karlashchuk 1700 127
A Stable Voltage Repeater with MOST Input — A. A. Bystrov and V. G. Vorzhev 1702 129
A Zero-Crossing Detector of High Phase and Amplitude Stability — A. M. Fishtein 1704 130
A High-Precision Phase-Difference Meter — A. S. Limonov, B. I. Poronik, and I. V. Peretyagin .. 1707 133
A Phase-Shift Generator — P. E. Stadnik and V. I. Kostenko 1710 135
A Delay Circuit for Analog Signals — A. I. Belich 1712 137
The Output Circuit and Wide-Band Low-Noise Preamplifier of a Pulsed NQR Spectrometer — I. A. Kuz'min and V. I. Privalov 1715 139
An ENDOR Cavity for Use at High Pressures — S. V. Kasatochkin, Yu. A. Timofeev, T. I. Alaeva, L. F. Vereshchagin, and E. N. Yakovlev 1717 140
Tuned Strip Cavities for Radiofrequency Spectrometers — A. P. Volodin, M. S. Khaikin, and V. S. Édel'man 1719 142
A 1-MHz Quartz Resonator with a Q Factor of $4.2 \cdot 10^9$ at a Temperature of 2°K — A. G. Smagin 1721 143
Measurement of the Refractive Index of Solid and Liquid Dielectrics at Submillimeter Wavelengths — E. E. Chigryai 1724 146
Measurement of the Refractive Index of Dielectrics and Semiconductors with a Submillimeter Spectrometer — F. F. Igoshin, A. P. Kir'yanov, V. V. Mozhaev, M. A. Tulaikova, and A. A. Sheronov 1727 148
Apparatus for Investigating the Electromagnetic Characteristics of Radio-Engineering Materials in the Superhigh Frequency Range — N. L. Yatsynina, L. P. Bel'skaya, and L. I. Ivolov 1730 151
Measurement of the Time Characteristics of Photoresistors — A. L. Andrushko 1733 153
A Universal Thermoregulator with a Wide Regulation Range — G. M. Georgiev, G. Kh. Kitaeva, and A. G. Mikhailovskii 1735 154
A Noise-Immune Power Supply Package — V. G. Galalu, Yu. M. Vishnyakov, and N. A. Solyanichenko 1737 155

GENERAL EXPERIMENTAL TECHNIQUES

Vacuum Gauge Leak Detectors — A. M. Grigor'ev and A. I. Fursov 1740 157
Apparatus for Mass-Spectroscopic Analysis of Plasma in Gas-Discharge Lasers — N. P. Egorov, V. N. Komarov, S. E. Kupriyanov, É. A. Trubacheev, and V. I. Volchenok 1743 159
CO_2 Laser Generating Simultaneously at Two Wavelengths and Having High Amplitude and Frequency Stability — P. A. Bykov, V. P. Epifanov, L. M. Pavlova, A. N. Sviridov, and I. I. Solonitsyn 1745 161
Stable Pulsed Light Source — Ngo Quok Byu, V. A. Kramarenko, A. L. Malakhov, M. N. Khachaturyan, and M. S. Khvastunov 1747 163
Generation of a Train of Short Light Pulses — V. V. Khmyrov and I. S. Tyryshin 1750 165

Engl./Russ.

Photodetector Features 10^7 Dynamic Range and High Time Resolution—V. V. Bacherikov, V. É. Kagain, and Yu. A. Makarov 1752 166
Pressure Pickup Using Gallium Arsenide Tunnel Diodes Irradiated with Electrons—N. P. Krivorotov, A. P. Vyatkin, V. N. Brudnyi, and M. A. Krivov 1754 168
Measurement of the Thermal Conductivity of Metals under Pressure at Low Temperatures—E. S. Itskevich and V. F. Kraidenov 1757 170
A Dilatometer for Solidified Gases—A. M. Tolkachev, A. N. Aleksandrovskii, and V. I. Kuchnev 1761 174
A Testbed for Large Superconducting Magnet Systems—I. L. Zotov, V. E. Keilin, E. Yu. Klimenko, I. A. Kovalev, S. I. Novikov, B. V. Petunin, B. N. Samoilov, A. N. Safronov, V. V. Svistel'nik, V. A. Taraban'ko, and N. A. Chernoplekov 1763 176
Leads of Capacity up to 10 kA for Superconducting Magnet Systems—V. E. Keilin and I. A. Kovalev 1776 178
Current Leads for a Cryostat for Short-Term Use—Yu. L. Buyanov and I. Yu. Shebalin 1769 181
The Head Part of the Cryostat for an Si(Li) Spectrometer—G. K. Khomyakov, N. V. Serykh, N. A. Skakun, and A. G. Strashinskii 1772 183
A Device for Broad-Beam X-Ray Recording at Low Temperatures in Electric Fields—S. Kh. Aknazarov, L. G. Shabel'nikov, and V. Sh. Shekhtman 1774 185
Miniature Holder for Measuring the Hall Effect and Electrical Conductivity—V. I. Glazov and V. F. Zhukov 1776 186
An Instrument for Monitoring the Surface State of Semiconductors by the Method of Contact Potential Difference—N. M. Aleinikov, A. N. Likholet, and A. K. Mudrov 1778 188
Continuous Monitoring of the Thickness and Deposition and Etching Rates of Dielectric and Semiconducting Films—V. N. Chernyaev, Yu. G. Obichkin, and É. I. Semenov 1781 191
Deposition of Gold Films on Germanium and Silicon Single Crystals—I. B. Krikshtopaitis ... 1783 193
Measurement of the Thickness of Thin Films—V. I. Khatnikov 1784 194
Attaching Electrodes to Thin Films—I. B. Krikshtopaitis 1786 195
A Line Scanner—I. M. Kol'tsov, V. L. Mamaev, L. A. Markova, V. P. Mikheev, and B. S. Rozov 1787 196

DEPOSITED PAPERS

A Photoelectric Scintillation Spectrometer for Plasma Vacuum UV Emission—A. A. Vekhov, R. A. Nikolaev, and V. B. Rozanov 1789 198
A Pulse Probe Method of Thermoelectric Parameter Measurement on Semiconductors—Yu. G. Basin, Yu. A. Grits, and V. I. Isachenko 1791 199

REVIEWS OF INSTRUMENTS

A Field-Effect Transistor in the BI-9 and BI-10 Ratemeters—I. N. Likhtman 1792 200
An Electron-Beam Evaporator Fitted to a UVM-2M2 Equipment—M. I. Korobov, L. N. Linnik, and Z. E. Vaiman 1791 201
An Internal-Reflection Attachment for the UR-10 and UR-20 Spectrophotometers—V. I. Golovachev and S. S. Gusev 1796 202
Interference Pattern Stabilization for a Universal Fabry-Perot Spectrometer—G. I. Stotskii and V. M. Shustryakov 1798 203
A Magnetic Field Sweep Device for the RYa 2301 Radiofrequency Spectrometer—A. M. Panich, Ya. V. Vasil'ev, and N. K. Moroz 1800 204
Measurement of the Magnetic Field of Large-Gap Magnets to an Accuracy of ±0.03% with Laboratory Instruments—D. M. Ioshe 1802 205
An Adjustable Current Stabilizer for FL-1 Electromagnet—V. A. Antipin and Yu. V. Ergin .. 1804 206

NEW INSTRUMENTS

Multichannel Digital Statistical Analyzer for Random Processes—A. A. Os'minin, A. D. Gorbokonenko, A. S. Lushnikov, M. G. Kashin, and N. G. Zakharov 1806 208
